EXAMPLES OF PROJECTS IN INDONESIA

Project	Project Description	Client	Lead Consultant	Duration of Project (months)	Completed (year)
Provincial Master Plan (to year 2020), Riau Province (87,023 sq km), Sumatra	TOWNLAND led a multi-disciplinary consortium of International and Indonesian Consultants responsible for producing a comprehensive Master Plan for Riau Province, Indonesia. The Master Plan provided a consensus platform for long-term decision making on physical, economic and social development in the Province up to 2020. Expert opinions were delivered in some 25 fields of development from planning mechanisms to tourism development, from international economic co-operation to health care development. The Project took place during a process of decentralisation by the Indonesian Parliament, which returned a substantial access to local resources and revenues to the Regency administrations and local authorities. A series of executable 5 year Action Plans of prioritised investments, underscored with appropriate institutional development recommendations, were developed as a key component of the Master Plan.	PT. Caltex Pacific Indonesia / University of Riau	TOWNLAND	11	2003
Development Consultancy Advisory Services to Thiess Contractors in Their Tender to Provide Contracting Services	A strategic Planning Report was prepared for Construction Services to be provided by Thiess covering, inter alia, details on key local Government, community, industry and other personnel; advice on local capability to undertake work by subcontract including civil works, piping and mechanical works, structural steel fabrication and erection and electrical and instrumentation, including assessment on local management capability, financial capability and commercial skills; details on supporting infrastructure available; key actions required to facilitate success in securing the construction services contract.	PT. Thiess Contractors Indonesia	TOWNLAND	N/A	2003
Social/Community Risk Mitigation Advisory Services, Company Darajat Plant 3, Garut, West Java	The Consultancy Service Assignment was focussed upon concerted actions vis-à-vis the local community in the vicinity of the new Plant and within Kabupaten Garut. The actions were geared towards creating mutual benefits for the Company and for the local population as a result of the construction of the new Plant including, inter alia, risk mitigation and non-disturbance of the construction schedule. Phase 1 was a short survey assignment sufficient to formulate a clearer understanding of the scope of potential issues and to make proposals for Phase 2, a multi-disciplinary study of options. Subsequent Phases dealt with setting up mitigation activities, mitigation during construction and community relations during operations.	Amoseas Indonesia Incorporated	TOWNLAND	N/A	2004
Pre-design Open Competition of Ngasem Market Tourism Area (1.28 ha approx.), Yogyakarta, Central Java	TOWNLAND prepared a design entry for the Ngasem Market Tourism Area in the central district of Yogyakarta. The design focused on meeting the daily needs of local residents through the provision of traditional market activities and on attracting tourists to the Market through the provision of spaces for the sale of local arts and crafts, the integration of gathering and performance spaces, and through unique architectural and landscape design. FIRST PRIZE AWARDED.	The Urban & Regional Development Institute for Yogyakarta / Local Government	TOWNLAND	2	2004
Master Planning of 710 ha of Land at Cikande, Serang, West Java	TOWNLAND prepared a Conceptual Plan and Master Layout Plan for a Comprehensive Business Use/Industrial Development with Supporting Uses on the Site.	PT. Mustika Lodan	TOWNLAND	3	2004

Land Use Planning Study (5,600 ha) and Development Parcel Guidelines (3,000 ha) for the New Jababeka Area, Jakarta	TOWNLAND was commissioned to prepare a long term Strategic and Land Use Planning Study and Development Parcel Guidelines (i.e. development regulations) for the 5,600 ha New Jababeka Area, a major extension of one of Jakarta's premier industrial estates. The Strategic / Land Use Plan sets out the overall development direction and the physical framework for the implementation of a new vision for Jababeka, which shifts its position from that of an industrial estate to that as a self-sufficient New Town.	PT. Kawasan Industri Jababeka, Tbk	TOWNLAND	3.5	2006
Site Planning of Sectors 3 and 4 (200 ha), Kota Deltamas, Jakarta	TOWNLAND was commissioned to prepare a comprehensive Site Plan for a 200 ha mixed use extension of the Kota Deltamas New Town in Jakarta. The Site is proposed for integrated residential development, a commercial corridor and social / educational area, recreation and green belt uses and areas for public services. In addition, TOWNLAND also prepared a Detailed Site Plan and Urban Design Guidelines for a 20 ha first phase of residential development from within the Site. The planning and design for the Site sought to cater to a socially diverse population and to create a vibrant, high quality and sustainable environment with a unique image and sense of place.	PT. Pembangunan Deltamas	TOWNLAND	3	2006
Conceptual Landscape/ Streetscape Design of Kemayoran Main Boulevard (4 km) and Key Areas, Jakarta	TOWNLAND was commissioned to undertake the Conceptual Landscape/ Streetscape Design for the Main Boulevard (4 km in length) and a series of key areas including (i) the Lake Recreation Area (11.7 ha); and (ii) the Food Leisure Area (2.8 ha). The Project will establish Kemayoran as an attractive and memorable CBD Destination within Jakarta by strengthening the place branding elements to introduce a new Vision and Brand for the Site.	Palazzo Group	TOWNLAND	2.5	2007
Master Plan (2.4 ha), Floodhandling Measures and Concept Architecture for Siemens Headquarters Site In Pulo Mas, Jakarta	TOWNLAND was commissioned to prepare a Master Plan, Site Plan, Flood Handling Measures and Concept Architecture for the SIEMENS Indonesia headquarters property owned by PT Siemens Indonesia in Pulo Mas, Jakarta. The Site comprises approximately 24,000 sqm. of land accommodating office/administration, manufacturing and warehouse uses. The Master Layout Plan prepared by TOWNLAND set out phased options for the further extension of office space on the Site to accommodate staff being relocated elsewhere in Jakarta and for business growth and was supported by detailed Site Plans and a Concept Architectural Design for a new office building of 12,800 sqm GFA. Flooding was a key consideration on the Site and flood handling measures were formulated to mitigate the risk of on site flooding.	Siemens Real Estate GmbH & Company OHG	TOWNLAND	2	2007

Review and Revisit of the Master Plan Prepared for the 'Bintaro Lifestyle Centre (21 ha)	TOWNLAND was commissioned by PT Jaya Real Property Tbk to undertake a review and to revisit the Master Plan prepared for the Bintaro Lifestyle Centre, to take into account changing market and development trends. The Site area comprised some 21 ha of land and is located in the Bintaro CBD. A new concept was developed for the Lifestyle Centre which envisaged an 'urban eco-village' comprising of low, medium and high rise garden offices, serviced apartments, a hotel and convention centre, a spa / health village and sports club and a comprehensive and innovative themed retail mall set around a "rainforest" landscape enclosed by a glass canopy.	PT Jaya Real Property, Tbk	TOWNLAND	1	2008
Master Layout Plan and Urban Design Guidelines for 3.3 ha of Land in Kota Modern, Tangerang, West Java	TOWNLAND was commissioned to prepare a Master Layout Plan, Macro Guidelines for Housing and Urban Design Guidelines for a 3.3 ha residential neighbourhood in Kota Modern, Jakarta. TOWNLAND assessed various master plan layouts for the Site with a view to maximising its development potential, whilst at the same time ensuring the establishment of a high quality residential neighbourhood supported by appropriate retail and community facilities and open space. In addition TOWNLAND prepared macro and urban design guidelines to guide subsequent implementation stages on the Site.	PT. Modernland Realty, Tbk	TOWNLAND	3	2008
Conceptual Landscape Planning and Landscape / Streetscape Design of Sorowako Town, South Sulawesi	TOWNLAND was commissioned to undertake Conceptual Landscape Planning and the Landscape/Streetscape Design for the Main Green Corridor of Sorowako Town (7 km), including connections to the Waterfront) and a series of Key Areas including (i) the Town Centre (4.4 ha); (ii) the Educational Area and Nursery (16.2 ha); (iii) the Two Lake Front Recreation Areas (12 ha and 7.3 ha, respectively); and (iv) the Dormitory Area (13.3 ha). The Conceptual Landscape Plan illustrates the overall open space system and the pedestrian and cyclist network whilst landscape/streetscape design elaborated the indicative designs for special features including hardscape and softscape elements, such as water features, planting and vegetation arrangements, public art, lighting, street furniture and signage.	PT. International Nickel Indonesia, Tbk	TOWNLAND	3	2008
Landscape Working Drawings for Three Key Areas to Include: 'Ide Beach; (2)Town Centre; and (3) Dormitory Area, Sorowako Town, South Sulawesi	TOWNLAND was commissioned by PT. International Nickel Indonesia, Tbk to undertake Landscape Consultancy Services in relation to the preparation of Landscape Working Drawings for 3 Key Areas within Sorowako Town, to include: (1) 'Ide' Beach (1.3 ha); (2) the Town Centre (1.5 ha); and (3) a Dormitory Area (5,000 sqm.). TOWNLAND prepared the design themes/interventions for the landscape and streetscape design of the Project and project managed and assisted in the preparation of Landscape Working Drawings for the implementation of the Conceptual Landscape Design for the 3 Key Areas.	PT. International Nickel Indonesia, Tbk	TOWNLAND	4	2008
Land Use Planning for 410 ha of Land in Phase 2 Kota Modern, Tangerang	TOWNLAND was commissioned to undertake a Land Use Planning Study with the Vision of an Aerotropolis City. TOWNLAND proposed a strategic land use plan comprising a new airport-linked community integrated with logistics businesses to include a Free Trade Zone, International Enclaves and Distribution Centre to attract the airline related businesses and foreign investment.	PT. Modernland Realty, Tbk	TOWNLAND	3	2008

Project	Project Description	Client	Lead Consultant	Duration of Project (months)	Completed (year)
Formulation of Conceptual Design Ideas / Vision and Preparation of an Illustrative Conceptual Layout Plan of Citragrand City (150 ha), Palembang, South Sulawesi	TOWNLAND was commissioned to prepare an Illustrative Conceptual Layout Plan of a New Town development which consists of several housing clusters, commercial development and public facilities. The strategic location of the Study Area, at the primary access to the Airport, will be advantageous to the future growth of the Town.	PT. Ciputra Development, Tbk	TOWNLAND	2	2008
Master Layout Planning for New Urban Centre and Residential Facilities on 250 ha of Land in Bekasi, Jakarta, West Java	TOWNLAND was commissioned to undertake a Master Layout Plan (MLP) for a 250 ha Site to the north of Bekasi City Centre, West Java. The primary objective in respect of the MLP is to develop a new urban centre and residential facilities aimed at the mid to high-end market. The new development will generate a distinctive high quality urban development that will act as a catalyst for the emergence of a new City Centre within the Bekasi Region. The development consists of three major precincts including two residential neighbourhoods and a Town Centre. The Town Centre will be a vibrant high-density development that will include a mixture of mid to high rise Mixed Use buildings. Uses will include shopping centres, office buildings, a hotel and apartment towers. Also catering for the Regional market, this precinct will become the new urban City Centre that will showcase a range of contemporary urban spaces and architecture. In comparison, the two surrounding residential neighbourhoods will consist of low-density residential developments, providing housing within a more green and tranquil suburban environment. In the initial planning for the overall structure of the development, the proposed flyover toll road (that bisects the southern part of the Site) was utilised as a catalyst to implement the concept of Transit Oriented Development (TOD) as the development's overriding urban theme. Existing water bodies were also retained and enhanced to provide residential neighbourhoods with green focal points. The development is a mixture of an efficient land utilisation and an organic spatial arrangement to create a pleasant urban experience for both residents and visitors alike.	PT. Summarecon Agung, Tbk	TOWNLAND	3	2009
Master Layout Plan of 48.8 ha of Land in Kelapa Gading (The Grand Orchard Development), North Jakarta	TOWNLAND was commissioned to prepare a Master Layout Plan (MLP) for a self-sufficient residential neighbourhood. It comprises several high-end villa clusters and a neighbourhood centre with area for social interaction which will provide the community with their daily needs. TOWNLAND is promoting an environmentally friendly residential neighbourhood by introducing an urban linear community park with strong pedestrian connectivity while maintaining the commercial viability of the development. The design phase is completed and the Project is currently under construction. The FIABCI AWARD WAS RECEIVED BY TOWNLAND from the Federation Internationale des Administrateurs de Biens Conseils et Agent Immobiliers / International Real Estate Federation for the Grand Orchard Development as the Best High-end Real Estate Development in Indonesia 2009 . The "green spine" and the high quality of residential environment are the major features acknowledged by the Jury. TOWNLAND's major contribution as Master Planners to this Development is recognised in the Award.	PT. Summarecon Agung, Tbk	TOWNLAND	2	2009

Master Layout Planning for The Springs Residential Development (120 ha) in Tangerang	TOWNLAND was commissioned to undertake a Master Layout Plan (MLP) for a 120 ha Site in the south-eastern part of Summarecon Gading Serpong District, Tangerang. The main objective of the MLP is to create a new residential district to cater to a high end market demand in this emergent area. The MLP achieves a competitive advantage in marketing the residential district compared to those elsewhere in Tangerang District, whilst achieving added value for the future residents. The layout is arranged such that a cluster of residential neighbourhoods integrate well with the natural features of the Site and its surrounds, at the same time promoting an active and healthy lifestyle. Each neighbourhood benefits from a centrally located Clubhouse, generous landscape treatment and efficient interconnected network of open space corridors, so that the future residents can enjoy community facilities, sports and leisure centre, lakeside park, central community park and riverside park. Convenient retail and commercial facilities are also provided for the residents in the southern portion of this new residential district. These facilities are located on the main road to increase both their visibility and viability without disturbing the ambience of the residential neighbourhoods themselves.	PT. Summarecon Agung, Tbk	TOWNLAND	3	2009
Site Planning for 21 ha of Land at Cengkareng, Tangerang, West Java	TOWNLAND was commissioned to undertake Site Planning for a 21 ha Site at Cengkareng, West Jakarta. The main objective of the Site Planning was to create a quality residential development in a relatively high density urban area. The development needed to provide a residential environment to cater to a high end market. The development scheme offers a distinctive urban arrangement with the main Boulevard feature creating a "sense of arrival" and "sense of place" and ample green open spaces embellishing the individual residential neighbourhoods within the development. To soften the appearance of the built form, there is a strong emphasis on the "organic" created by the curved form of the Boulevard leading to the hub of the Site, which comprises a Community Park, Lake and exclusive Club House. The Community Park has a striking golf theme to set this Residential Community apart from others in the area and to enhance its attraction. Mini Golf Facilities are provided and the landscape features resemble fairways and sand pits for a distinctive style. Also of note are the shop houses which flank the Site's boundaries to the west and south with ready public access and good visibility from the arterial and collector roads to enhance their attraction and economic viability. Within the Site, the individual residential neighbourhoods also enjoy greater privacy and a buffer from traffic pollution as a result.	PT. Agung Sedayu Group	TOWNLAND	3	2010

Kota Baru Parahyangan Design Competition for Master Layout Planning of the Town Centre (60 ha of Land)	<p>TOWNLAND was commissioned to prepare a Master Layout Plan (MLP) for 60 ha of land at the centre of Kota Baru Parahyangan, West Java. The main objective was to develop an MLP for a Town Centre as a new generator for further development in the District. The future development was to convey Kota Baru Parahyangan's image as an education hub as well as a vibrant commercial centre that serves greater Bandung and beyond.</p> <p>The primary design strategy was to create a strong identity for the Town Centre with unique yet clear structure of urban fabric with four major integrated development catalysts that are: Creative Hub; Lifestyle Centre; Living and Leisure Precinct; and Creative Industry Village. The Creative Hub, as the centre of higher education, is to be the main development generator, whilst Lifestyle Centre and Living and Leisure Precinct will create a vibrant ambiance to the development. Moreover, Creative Industry Village has a unique function that responds to the emerging creative industry in Bandung by providing artists with an inspiring environment.</p> <p>The arrangement of the MLP has an organic form facilitating smooth and flowing movement of people and activities between buildings, along pedestrian links, and within open spaces, thereby reflecting the endless stream of energy and creativity that the Development has to offer. Furthermore, the structure incorporates two West Java iconic natural landmarks (Mount Tangkuban Perahu and Lake Saguling) as the major visual axis to signify appreciation of nature.</p>	PT. Belaputera Intiland - Subsidiary of Lyman Group	TOWNLAND	8	2010
Conceptual Design Ideas/ Vision; Conceptual Layout Plan; and Broad Urban Design Guidelines for 200 ha of Land in Citra Grand City, Palembang	TOWNLAND was responsible for preparation of the design ideas and illustrations for marketing purposes, for the Conceptual Layout Plan and for a set of Broad Urban Design Guidelines to satisfy the Government requirements in respect of 200 ha of land in Citra Grand City, Palembang.	PT. Ciputra Development, Tbk	TOWNLAND	2	2010
Conceptual Land Use Plan for 1,187 ha of Land in Palembang	TOWNLAND was commissioned to undertake a Conceptual Land Use Plan for land abutting CitraGrand City, Palembang. The development objective was to assess the potential for further expansion of the City and integration with the successful Township. One of the most important concepts was how to incorporate the existing wetlands as an attractive feature in the development, as well as an eco-tourism destination while still preserving the natural habitat and educating people on how important the mangrove forest is for the environment. Another development highlight is the creation of an agro-tourism area in line with the Government Plan.	JO.Citra Asrigriya and PT. Ciputra Development, Tbk	TOWNLAND	1.5	2011

Conceptual Land Use Plan for 94.3 ha of Land in Citra Garden City 8 th Extension, West Jakarta	TOWNLAND was commissioned to undertake Conceptual Land Use Planning for one of the last areas within the Citra Garden City in West Jakarta. The design concept for the City has undergone major changes as a result of a new Government plan prohibiting residential development within a certain radius of Soekarno-Hatta International Airport. The major land use adopted for the development is a warehouse estate and complementary commercial and mixed use development. A significant portion of the Site that is perpendicular with the Airport's runway has been proposed as lawn and urban forest.	PT. Cakradigdaya Lokaraya and Ciputra Development, Tbk	TOWNLAND	1.5	2011
Conceptual Master Planning of a 1,500 ha Property Development in East Java	TOWNLAND was commissioned to prepare a Conceptual Master Plan for a new Satellite City for Surabaya, one of the most developed cities in Indonesia. The Site's major strategic features include a toll ramp from the new Surabaya-Mojokerto toll road, meaning that travel time from the City's CBD to the new development will take a considerably shorter time. The overall development is envisioned as a new and contemporary Township with integrated land uses for residential, commercial and industrial estates. Along the toll road frontage, a series of prominent development features will be visible to passing motorists and will present a strong image for this high profile development project.	PT. PP (Persero), Tbk and PT. Jasa Marga (Persero), Tbk	TOWNLAND	3.5	2011
Master Planning for Port Expansion (467 ha) for Tanjung Priok Jakarta	TOWNLAND was commissioned to prepare an Illustrative Master Plan for the expansion of Jakarta's Main Port at Tanjung Priok to cater to strong growth at the Port and to facilitate its role as one of the premier working waterfronts in South East Asia. The Project consists of several strategic developments, including: a high profile New Port at Kali Baru, a new Bekasi Inland Port, a new Marunda Inland Port and Depot and the expansion of the Jakarta International Container Terminal 2.	PT. Hutchison Ports Indonesia Tbk and Hutchison Ports Holdings	TOWNLAND	2	2011
Master Plan for 120 ha of Land, Modernland Jakarta East Estate	TOWNLAND was commissioned to prepare a Master Plan for 120 ha of land at Modernland Jakarta East Estate. The Site is strategically located on land in East Jakarta, amongst other residential real estate developments and takes advantage of strong residential sales opportunities in this popular area.	PT. Modernland Realty, Tbk	TOWNLAND	3	2011
Landscape Working Drawings of BSD Southern Gateways and Schematic Design of BSD Phase 2 Main Boulevard	TOWNLAND was commissioned to undertake Landscape Working Drawings and Schematic Design of the BSD Southern Gateways and Main Boulevard to enliven BSD's new image as a fast growing Township in Serpong, Tangerang. The new Gateways will be visible from a prominent regional highway and signify BSD's image to a wide potential market. The BSD Main Boulevard will be a prototype for BSD's new Boulevard network in the new expansion areas. The design of the Main Boulevard conveys the development concept of a lush green tropical Township.	PT. Bumi Serpong Damai, Tbk	TOWNLAND	2	2012
Site Planning of 2 Residential Clusters of Summarecon Bekasi (12 ha) in Bekasi, West Java	TOWNLAND was commissioned to undertake Site Planning for Summarecon Bekasi's first development phase. To cater to the mid-end and upper mid-end market, two clusters were designed to fit in with the overall development objective as a new prominent Township in Bekasi region. The upper mid-end cluster is positioned next to a lake, providing residents with attractive linear lakeside parks.	PT. Summarecon Agung, Tbk	TOWNLAND	1	2012

Conceptual Master Planning for 30 ha of Land of Anaamaya Resort, Sanur, Bali	TOWNLAND was commissioned to prepare Conceptual Master Planning for a large scale integrated Resort in the prestigious tourist destination of Sanur in Bali. The Project's main objective was to develop a new image for tourism within the Sanur area by developing a destination which would cater to new target markets. As the Site is in a prominent location with scenic views of Sanur Beach, the overall concept focused on enlivening Balinese heritage over a range of facilities which consisted of a five star condotel, resort villas, a cultural centre, a shopping arcade, an exhibition centre, a serviced apartment complex and a beach club. The development concept applies an ecological approach through the retention and incorporation of the Site's valuable existing trees.	PT. Anaamaya International	TOWNLAND	3	2013
Conceptual Master Planning for 50 ha of Land in Pamulang, Banten	TOWNLAND was commissioned to prepare a Conceptual Master Plan for a 50 ha residential and commercial development in Pamulang, Banten. The design process for the development placed a strong emphasis on identifying the appropriate target market for the area and the development of products that correspond with the market's needs. The design concept for the Project drew on the concept of lotus philosophy to create an innovative and attractive development structure.	PT. Sinar Sukses Lestari	TOWNLAND	3	2013
Conceptual Landscape Planning for 40 ha of Land in Lakarsantri, Surabaya, East Java	TOWNLAND was commissioned to prepare Conceptual Landscape Planning and Landscape Design Guidelines for a new Township development at Lakarsantri in Surabaya, East Java. The main concept of the Project focused on changing the negative perception of the area caused by the existence of the high tension lines. A variety of different thematic public open spaces were proposed including an Urban Festival and Agrotourism Area, Urban Scenic Area, an Urban Eco-Park and an Urban Play-Park.	JO. Ciputra Mutiara Cemerlang Abadi and PT. Ciputra Development, Tbk	TOWNLAND	2	2013
Conceptual Master Planning for 32 ha of Land in Situ Cihuni in Tangerang, Banten	TOWNLAND was commissioned to prepare a Conceptual Master Plan for an area surrounding and within Lake Cihuni. To maximize the land value within the Project and to capitalize on lake views, a high density development was proposed with a strong lakefront character. A variety of development features were created to add to the attractiveness of the development, including artificial islands, floating restaurant, a green lifestyle centre and iconic bridges.	Mahanaim Group	TOWNLAND	3	2013
Signage Design for Summarecon Bekasi	TOWNLAND was commissioned to undertake the design of a signage system and hierarchy for the whole area of Summarecon Bekasi. TOWNLAND's package of signage design included identity signage, directional signage, information signage and regulatory signage. The design theme adopted for the Project sought to increase the Summarecon Brand's visibility and recognition and to support better wayfinding within the new emerging modern Township of Summarecon Bekasi.	PT. Summarecon Agung, Tbk	TOWNLAND	2	2013
Conceptual Master Planning for 19 ha of Land in Lampung, Sumatra	TOWNLAND was commissioned to undertake Conceptual Master Planning for a Mixed Use Complex on 19 ha of land in Lampung. The Project aims to develop a large scale and unique commercial destination in Lampung.	PT. Lingkarindo Buana Raya	TOWNLAND	3	2013

Preliminary Conceptual Master Plan for 1,250 ha of Land of Mandalika Resort In Lombok	TOWNLAND was commissioned to prepare a Preliminary Conceptual Master Plan for the Mandalika Resort in Lombok. The Project represents a strategic component of the emerging tourism development in East Indonesia and attention was focused on deriving an appropriate tourism product mix and a strategic development structure in line with the short term, medium term, and long term development plan.	PT. Global Land Development, Tbk	TOWNLAND	2.5	2013
Landscape Design of Sunkyoung Golf View Cluster (2 ha), Summarecon Serpong	TOWNLAND was commissioned to prepare comprehensive Landscape Design Services for one of the most prestigious residential clusters, the Emerald Cove, at Summarecon Serpong. TOWNLAND's Services included for Conceptual Landscape Design through to the Tender Documentation stage and Periodic Site Inspections during the construction period. The Design encompassed the Main Gateways within the development as well as streetscape design within each development cluster. The design theme for the Project drew on the concept of tropical resort living, that combines lush tropical planting with a modern high-end residential ambience.	PT. Serpong Cipta Kreasi	TOWNLAND	5	2013
Landscape Design of Bromelia Cluster (2.6 ha) at Casa Jardin Residence, W. Jakarta	TOWNLAND was commissioned to undertake Landscape Design from the Conceptual Landscape Design Stage up to Landscape Tender Drawings and Implementation Specifications for the Bromelia Cluster at the Casa Jardin Residence, West Jakarta. The intention in respect of the Project is to upgrade the development to a high-end residential cluster by implementing high quality landscape design.	PT. Global Budi Perkasa	TOWNLAND	3	2013
Conceptual Master Planning for 20 ha of Land in Senggigi, West Lombok	TOWNLAND was commissioned to undertake the Conceptual Master Planning for a resort in the well-known tourist destination of Lombok. The design concept is focused on the creation of a signature development and a new destination catering to the high-end tourist market and featuring a host of leisure facilities including: a four star family hotel, resort villas, an integrated spa and wellness centre, a cultural hub and a food and beverage area. The development is focused on the Site's abundant natural beauty and scenic views of the beach and Lombok Strait, the picturesque estuary of Kerandangan River, the mangrove forest and also views of the distant highlands.	PT. Pantai Indah Kerandangan	TOWNLAND	3	2013
Landscape Design Hotel Grand (0.44 ha), Sahid Jaya Jakarta	TOWNLAND was commissioned to undertake a comprehensive renovation of the landscape design for the five-star Grand Sahid Jaya Hotel in Jakarta, from Conceptual Landscape Design up to Tender Documentation and Periodic Site Inspections during the construction and maintenance periods. The Project aims to revive this heritage Hotel by emphasizing royal Javanese culture within the design concept, which creates a perfect harmony between charming ancient philosophy and luxury modern urban indulgence. Conceptual Master Planning for 8 ha of Land in Ngaliyan, Semarang, Central Java	TOWNLAND was commissioned to prepare a Conceptual Master Plan for the last piece of land in the Permata Puri residential estate in Semarang. The main objective of the Project is to increase land value significantly taking into account the Site's context and market in order to cater to the new emerging market of middle class residents. The development is proposed as the new hub for the entire estate and will provide new and attractive facilities as well as a garden concept of housing that fits with the Government's requirement to preserve the area as a water catchment for the entire City.	PT. PP (Persero), Tbk	TOWNLAND	3	2013
Conceptual Master Planning for 40 ha of Land in Cirebon, West Java	TOWNLAND was commissioned to prepare a Conceptual Master Plan for Ciputra's new development in Cirebon. The development objective is aimed at providing a well-designed residential estate complemented with a variety of public facilities to provide residents with high quality services that live up to the Developer's image. The Conceptual Master Plan adopts an organic structure which will create a pleasant ambience for residents.	PT. Ciputra Development, Tbk	TOWNLAND	3	2013
Soft Landscape Design of The Main Gateway and Mall in Citra Gran Cibubur, West Java	TOWNLAND was commissioned by the Ciputra Group to undertake comprehensive Soft Landscape Design Services for the Main Gateways and Mall in CitraGran Cibubur. TOWNLAND's Services included Conceptual Soft Landscape Design through to the Tender Documentation stage and Periodic Site Inspections during the Construction Period. The Project is for renovation of the Main Gateways of this Residential area and the Commercial Arcade along the Main Boulevard, as well as the design of the al-fresco dining, lobby drop-off and parking areas within the Mall Complex.	PT. Sinar Bahana Mulya	TOWNLAND	5	2013
Conceptual Landscape Planning for ±47 ha of Land in Medan, North Sumatra	TOWNLAND was commissioned to undertake Conceptual Landscape Planning and Landscape Design Guidelines for a new residential area in Medan, North Sumatra. The area comprises several clusters of landed housing, shophouses, a mall and supporting facilities, which are targeted for the high-end market. The design focuses on the creation of attractive open space areas in between the different land use functions that serve as the showcase for tropical landscape in the Indonesian archipelago. TOWNLAND's Services included also Conceptual Landscape Design through to the Tender Documentation stage and Periodic Site Inspections during the Construction Period for one of the clusters, for the main boulevard and for the main open space area in between the clusters.	PT. Bukit Makmur Land	TOWNLAND	2	2013
Landscape Design for ±4 ha of Land and Conceptual Landscape Design of the Main Gateway in Barombong, Makassar, South Sulawesi	TOWNLAND was commissioned to undertake Conceptual Landscape Design Services for the Main Gateways of a new residential area in Barombong, South Makassar. The design makes a grand and state-of-the-art entrance statement. The challenge of the Project lay in the creation of an iconic feature within limited available space. An optimal combination of native planting and cost-effective hard materials was chosen for the design solution.	PT. Lippo Karawaci Tbk	TOWNLAND	0.75	2013

Project	Project Description	Client	Lead Consultant	Duration of Project (months)	Completed (year)
6 ha of Land in Uluwatu Cliffs, Bali	TOWNLAND was commissioned to prepare a Master Plan for a Villa and Suite Resort on a spectacular 6.5 ha Site on the Uluwatu Cliffs in Bali. The Resort comprises 56 Villas and 30 Suites, various food and beverage outlets, event spaces and spa facilities, all set within lush tropical landscaping. Hotel Villas are terraced down towards the cliff edges to maximize ocean views, whilst stacked building volumes are cut into the cliff faces for the Hotel Suites to create an iconic and unique Development, a first in Bali. In addition, Resort swimming pools are terraced from the highest point on the Site, down towards the cliff edge to create the unique spatial experience of falling water.	Orang Tua Group	TOWNLAND	3	2013
Conceptual Master Planning for 13 ha of Land in Batam, Kepulauan Riau	TOWNLAND was commissioned to prepare a Conceptual Master Plan for a 13 ha Site in Batam, an emerging industrial island in the vicinity of Singapore. The Site's strategic location next to a busy and prominent harbour and right inside the local Government quarter is a strong impetus for the development's marketability. The Vision for the Project is to prepare an innovative Conceptual Master Plan which capitalises on the scenic views of the Bay and adjacent mangrove island, and to formulate the right development product mix which will attract a foreign market to Batam with an emphasis on Singapore.	PT. Dwi Tunggal Surya Jaya	TOWNLAND	3	2013
Conceptual Master Planning for ±23 ha of Land at Kelapa Gading, North Jakarta	TOWNLAND was commissioned to prepare a Conceptual Master Plan for a Mixed Use development at Kelapa Gading. The Project was aimed at capitalising on the Development's high-profile location, on dovetailing with Jakarta's very tight Government Spatial Planning Regulations and to match the market demand prevalent at the time. Several obstacles were overcome through design solutions including the integration of separate land parcels and interface issues with existing settlements, all the while maintaining an upscale image of the overall Development.	PT. Teguh Timur	TOWNLAND	3	2013
Landscape Design of Scientia Office Park (5.65 ha), Summarecon Serpong	TOWNLAND is commissioned to undertake comprehensive Landscape Design Services from Conceptual Landscape Design up to Tender Documentation and Periodic Site Inspections during the construction period for the Scientia Office Park in Summarecon Serpong. The Vision for the Project emphasises the establishment of a landscape environment which will contribute to a sustainable lifestyle within the context of an Ecological Office Park. The Project aims to achieve a Gold Certificate from the Green Building Council Indonesia.	PT. Kharisma Intan Properti	TOWNLAND	3.5	2014
Preliminary Conceptual Master Plan for ±60 ha of Land in Citra Gran 2, Cibubur	TOWNLAND was commissioned to prepare a Preliminary Conceptual Master Plan for an extension of the already established CitraGran Cibubur, one of Ciputra's well-known developments on the outskirts of Jakarta. The main purpose of the Project was to create a plan that maximised the Site's future potential as a mid-density Mixed Use Development, taking into consideration the Site's adjacency to a main regional access road, Cikeas Riverbank and its interesting topographic setting.	PT. Sinar Bahana Mulya	TOWNLAND	2	2014

Project	Project Description	Client	Lead Consultant	Duration of Project (months)	Completed (year)
Site Planning for ±21 ha of Land in Citra Gran Cibubur, West Java	TOWNLAND was commissioned to undertake the Site Planning for the last piece of land at CitraGran Cibubur. CLIENT envisioned the land as the most prominent cluster in the development and targeted the same for the high-end and upper mid-end target market. The main design principles were: (1) to incorporate existing topography with the high-end housing products by creating "upslope" and "downslope" typologies; and (2) to maximize views to the Cikeas River.	PT. Sinar Bahana Mulya	TOWNLAND	2	2014
Conceptual Master Planning for ±17 ha of Land at Grand Bangka City, Pangkal Pinang, Kepulauan Bangka Belitung	TOWNLAND was commissioned to prepare a revised Conceptual Master Plan for 17 ha of land in Grand Bangka City. The main challenge of the Project was to integrate the existing constructed buildings (a Modern Market and four Shop Houses) into a revised design approach. Since the Site is not directly visible from the main regional road and as it is located on higher ground which people associate with being "lucky", the area was developed as housing clusters for the upper mid-end target market. Each cluster is given a sense of place by a Grand Gateway and defined Neighbourhood Park to emphasise comfortable living. The Development also features a shophouse strip to capitalize from possible connections to existing roads.	PT. Pinang Jaya Murni	TOWNLAND	3	2014
Conceptual Master Planning for ±240 ha of Land at Kota Harapan Indah, Bekasi, West Java	TOWNLAND was commissioned to prepare Conceptual Master Plans for two Sites within Kota Harapan Indah - a large scale Township development in Bekasi. The first Site is located at Setia Asih Village, and is targeted for upper high-end residential development with prominent open spaces featuring man-made lakes. To comply with the objective of an environmentally sound development, water sensitive urban design principles are applied, which gives added value to the Development. The second Site is located at Segara Jaya Village and is allocated for mid-low end residential development which will be compatible with the surrounding context of warehousing estates.	PT. Damai Putra Group	TOWNLAND	3	2014
Conceptual Master Planning and Broad Urban Design Guidelines for ±30 ha of High Density Residential Area at Summarecon Bekasi, Bekasi, West Java	TOWNLAND was commissioned to prepare a Conceptual Master Plan and Broad Urban Design Guidelines for the first Transit Oriented Development in Bekasi and notably in Greater Jakarta. CLIENT's Vision is that in the near future, Jakarta's inhabitants will desire a different lifestyle with a focus on high density residential complexes serviced by public transportation. A Transit Oriented Development system is proposed focused on a BRT system and connections to a regional railway network. Upon development, this high density residential Development will accommodate more than 30,000 people. To create a pleasant and sustainable living environment, a large and well-designed lake is created at the centre of the Development for both water retention and as a community open space leisure facility.	PT. Summarecon Agung Tbk	TOWNLAND	4	2014

Preliminary Conceptual Master Plan for ±4 ha of Land at Balikpapan, East Kalimantan	TOWNLAND was commissioned to prepare a Preliminary Conceptual Master Plan for a development at Balikpapan, the fastest growing City in Borneo. The key concepts applied to the Master Plan are to create a distinct structure plan that utilises the existing topography of the Site to create a resort-like residential enclave and which capitalises on the narrow frontage along the main regional access for commercial uses.	PT. HK Realtindo	TOWNLAND	2	2014
Preliminary Conceptual Master Plan for ±48 ha of Land in Villa Bukit Raya, Tangerang, Banten	TOWNLAND was commissioned to prepare a Preliminary Conceptual Master Plan for a new lifestyle hub and supporting uses next to a small cargo airport. The Site's surrounding context was very promising as a renowned area for mid to high-end residential development in Southern Jakarta. To capitalize on this opportunity, a series of land uses was proposed including a terraced open air Mall, Resort Apartment Complexes, Shophouses and Riverside Residential Clusters. To enliven the Development's character, the architectural expression of the buildings adopted a tropical modern concept in line with overall spatial planning for the Development.	PT. Bakti Alam Sentosa	TOWNLAND	3	2014
Conceptual Landscape Planning and Landscape Design Guidelines for ±55 ha of Land in Villa Bukit Raya, Tangerang, Banten	TOWNLAND was commissioned to undertake Conceptual Landscape Planning and Landscape Design Guidelines for a new residential area on the outskirts of Jakarta. The Development aims to be a new one-stop destination for the area and represents a modern integrated urban hub, comprising several clusters of landed housing, commercial strips and highrise developments in the form of apartments, a hotel and a mall, which are targeted for the high-end market. The design focused on the creation of liveable open space areas. TOWNLAND's Services also included Conceptual Landscape Design through to the Tender Documentation stage and Periodic Site Inspections during the Construction Period for the Main Gateways, Marketing Office, and the renovation of the Gateways into the existing residential cluster.	Wiraland Property Group	TOWNLAND	2	2014
Conceptual Master Planning for ±16 ha of Land of Kraton Residence at Krian, Sidoarjo	TOWNLAND was commissioned to prepare a Conceptual Master Plan for an existing unsuccessful residential estate at Krian, a well-known Industrial Area not far from Surabaya. The development approach was to thoroughly revisit the design and layout of the Site in the context of its surrounding land uses which consist predominantly of industrial related functions and warehouse estates, and to prepare a realistic Conceptual Master Plan which responded to the same.	PT. Ready Indah	TOWNLAND	3	2014

Conceptual Master Planning for ±900 ha of Land at Pantai Indah Kapuk, North Jakarta	TOWNLAND was commissioned to prepare a Conceptual Master Plan for a Township development which was a part of a comprehensive mega scale development in northern Greater Jakarta. The development concept includes a unique structure with a strong high-density CBD at the centre overlooking a 3 km long Central Park bisected by a major river. A lively and attractive waterfront open air lifestyle centre features in the Park. Two meandering canal systems are proposed to enliven the Development which maximises the waterfront for canal view type housing. Dedicated bicycle paths are also incorporated into the Plan offering residents and visitors exciting cycling experiences which promote a healthy lifestyle and more sustainable living.	PT. Kukuh Mandiri Lestari	TOWNLAND	3	2014
Landscape Design for ±1.6 ha of Land at Lake Area, Trivium Lakeside Park, Lippo Cikarang, Bekasi	TOWNLAND was commissioned to prepare comprehensive Landscape Design Services for a Mixed Use development in Lippo Cikarang. TOWNLAND's Services included an Existing Tree Survey and Conceptual Landscape Design through to the Tender Documentation stage. The Project comprised the development of a Lifestyle Centre, Townhouses, a Hotel and an Office Complex and sought to create liveable open spaces along the waterfront of the lake. A key objective of the Project was the preservation of high quality mature trees on Site.	PT. Waska Sentana	TOWNLAND	4	2014
Conceptual Master Planning and Site Planning for ±22 ha of Land in Lippo Cikarang, Bekasi	TOWNLAND was commissioned to prepare a Conceptual Master Plan and Site Plan for the Trivium Development, a sub-centre of Lippo Cikarang, one of the biggest industrial Townships in the east part of Greater Jakarta. The main feature of the Trivium Development is a natural lake and the special structure adopted in the Master Plan oriented to the same, creating an integrated lakefront development. The Development consists of a variety of uses including a Business Loft Complex, Townhouse Clusters, a SoHo Complex, a Waterfront Lifestyle Centre, Mini Office Towers and a Sports Centre. Many of these products are unique and provide a new development product for the CLIENT.	PT. Lippo Cikarang	TOWNLAND	3	2014
Site Planning for ±10 ha of Land in Bengkuring, Samarinda, East Kalimantan	TOWNLAND was commissioned to prepare a Site Plan for a low-end residential development on the outskirts of Samarinda, the Capital City of East Borneo Province. Conceptual Master Planning for +/- 43 ha of Land in Semarang, Central Java	<p>TOWNLAND was commissioned to prepare a Conceptual Master Plan for a ±43 ha Reclamation on the coast of Semarang, Central Java.</p> <p>Through close collaboration with CLIENT, an extensive number of development scenarios was explored - from low density and exclusive residential waterfront housing, to primarily commercial developments to a mix of relatively dense landed housing combined with a lifestyle mall.</p> <p>Ultimately, CLIENT opted for an Option where the Site's spectacular waterfront is reserved for the development of landed housing, while the 'in-land' is reserved for a commercial development - a parcel that not only services the future 325 dwellings within the Site, but also provides a new destination shopping mall of approximately 150,000 m² GFA that fits within the Lippo Group's portfolio of shopping malls around the Country, and includes a Hotel, Hospital and School.</p>	PT. Gempita Cipta Bersama (Subsidiary of Lippo Group)	TOWNLAND	3	2014
Landscape Design of Kirana Commercial Avenue Mixed Used Development (2.36 ha), Kelapa Gading, North Jakarta	TOWNLAND was commissioned to prepare comprehensive Landscape Design Services for a new iconic and prominent Mixed Used Development in Kelapa Gading. TOWNLAND's Services included Conceptual Landscape Design through to the Tender Documentation stage and Periodic Site Inspections during the construction and maintenance periods. The Project comprises a Lifestyle Centre, Offices, Retail and a Hotel (operated by Swiss-Bell) and required TOWNLAND's Landscape Design Services on a variety of podium levels.	PT. Nusa Kirana	TOWNLAND	3.5	2015
Conceptual Master Planning for ±42 ha of Land in Mataram, West Lombok	TOWNLAND was commissioned to prepare a Conceptual Master Plan for a "mini" Township development at Mataram, the capital City on Lombok Island. As an emerging Tourist Destination, Lombok lacked contemporary property development, and the Development Concept for the Site sets a new precedent for high quality modern urban development incorporating commercial and residential uses.	PT. Ciputra Karya Mandiri	TOWNLAND	3	2015
Conceptual Master Planning for ±150 ha of Golf Development, and Site Planning for for ±40 ha of the Lido Lakes Resort and for ±80 ha of Golf Residential in Lido, Bogor, West Java	<p>TOWNLAND was commissioned to prepare Conceptual Master Planning for a +/-150 ha of Golf Development, Site Planning for for ±40 ha of the Lido Lakes Resort and Site Planning for ±80 ha of Golf Residential in Lido, Bogor, West Java, Indonesia.</p> <p>The Development is projected to become a 5-Star, high-quality development, comprised of: an International- and PGA-standard 18-hole Golf Course under Ernie Els' signature brand; and residential areas and hospitality facilities, such as Golf Clubhouse, Golf Hotel, SPA Resort, etc. With its amazing potential, it is expected to be one of the best Lakes Resorts and Golf Developments in West Java - a spectacular sport-tourism destination and residential getaway for more than 5,000 people, which will enliven the area, boost the Tourism Sector, and support Bogor Regency.</p>	PT. Conceptual Master Planning for ±285 ha of Land in Kota Samarinda Baru, Samarinda, East Kalimantan	TOWNLAND was commissioned to prepare a Conceptual Master Plan for a Township development at Samarinda, East Borneo. The Site featured very challenging topography which provided a benefit in terms of achieving a unique overall development character. The Development comprised of a mixed use complex along the cliffs featuring "hanging" buildings on stilts, creating a "grand gesture" at its main entrance. A CBD was proposed at the centre of the Development, surrounded by a primary loop road lined with commercial development which sought to distribute commercial activities evenly throughout the Development. To prevent flooding, vast polders were proposed and the same were proposed to be used as a platform for upscale lakeside housing clusters.	PT. Diya Inti Persada Raya	TOWNLAND	3	2015
Conceptual Master Planning for ±18.7 ha of Land at Bukit Intan, Pangkal Pinang, Bangka, Belitung Island	TOWNLAND was commissioned to prepare a Conceptual Master Plan for a Mixed Use area in Pangkal Pinang on Belitung Island. With increasing competition from prominent Developers, the Development had to create an attractive spatial planning layout and new development products which would attract the mid to high-end markets. The main land uses proposed in the Development were a contemporary Open Air Mall, a Financial District, a Mixed Use area with Function Hall, a Hotel, Apartments, and "garden-like" Residential clusters. Several natural and man-made water features were utilized in the design to create interesting open spaces throughout.	PT. Tiga Kota Semacang	TOWNLAND	3	2015
Conceptual Master Planning for ±103 ha and Conceptual Landscape Planning for ±266 ha of Land at Jakarta Garden City, East Jakarta	TOWNLAND was commissioned to prepare a Conceptual Master Plan for the Central Business District of Jakarta Garden City, a prominent Township in East Jakarta. The CBD is envisioned as one of Jakarta's vibrant high-density new centres. A prominent feature of the Development included a main junction with landmark buildings interconnected between towers via a circular pedestrian bridge. TOWNLAND was also commissioned to prepare Conceptual Landscape Planning for the Project with an emphasis on applying water sensitive urban design principles and creating a lush "garden" character throughout the Township.	PT. Mitra Sindo Sukses	TOWNLAND	3	2015
Conceptual Landscape Design for 2.3 ha of Land for a Club House at The Sagamore Hills in Taman Dayu in Pandaan, East Java and Conceptual Landscape Design for 2.2 ha of Land at Main Gateway to Taman Dayu in Pandaan, East Java	TOWNLAND was commissioned to undertake Conceptual Landscape Design Services for the beautification of the main Gateways and design of the Clubhouse area in Taman Dayu, Pandaan, East Java. The beautification of the main Gateways comprised of the re-design of roadside berms, medians and waterbodies. Iconic entrance statements were used for the Gateways and the landscape itself served as the sculpture throughout the open space areas as derived from Charles Jenks' concept of sculptural mounding. The design of the Clubhouse focused on the Swimming Pool area, Main Entrances and Parking Areas.	PT. Ciputra Surya Tbk.	TOWNLAND	1	2015

Preliminary Conceptual Master Plan for 420 ha of Land in Pekanbaru, Riau. Sumatra	TOWNLAND is commissioned to develop a Preliminary Conceptual Master Plan for a Site of 420 ha in Pekanbaru, one of the main cities in Sumatra. The Project is focused on the creation of a new Township that fulfils the City's pressing need for high quality and ecologically conscious development to live, work and play. The development concept capitalises on the adjacent lake as its main development feature. To emphasise the ecological features of the Site, a series of interconnected green corridors were proposed to provide residents with convenient linear parks for various activities and to encourage walking as a mode of transport. Landscape Design for ±1.8 ha of Land at Allium Arum Hotel, Cepu, Central Java	<p>TOWNLAND was commissioned to undertake Conceptual and Schematic Landscape Design, Landscape Design Development and Periodic Inspection and Monitoring during the Construction Period for the Allium Arum Hotel in Cepu, Central Java.</p> <p>The Project is a Business Resort Complex with 3 Star and 4 Star Hotels. It targets Indonesian and International business travellers with interests in the oil and gas sector as Cepu is the commercial centre of the Cepu Block, which is a multi-billion dollar oil and gas exploration concession.</p> <p>The Resort Complex has been designed to facilitate conventions, exhibitions and training events with a purpose built ballroom and event gardens. The Complex is also suitable for wedding/birthday parties, music concerts, outdoor business events, seminars and workshops.</p> <p>The landscape has been designed to facilitate these business and event needs in a sophisticated lush tropical garden setting that envelops the colonial architecture. Guests can stroll and jog in the gardens, while having opportunities to meet in several outdoor meeting areas. The ballroom has been designed to open up into the landscape, thereby extending the cocktail and dining ambiance.</p> <p>A boutique pool is located in the centre of the business resort complex and has a tropical colonial character. Lush tropical gardens envelop the boutique pool and provide privacy to guest rooms at the ground floor level. The other side of the pool is bordered by the terraced landscapes with an outdoor amphitheater, inspired by the indigenous paddy field surrounding the Resort Hotel Complex. To integrate and complete the setting, a footpath traverses the property linking guests to a viewing deck, outdoor dining garden and a natural pond.</p>	PT. Conceptual Master Planning for 800 ha of Land and Site Planning for 100 ha of Land in Tanjung Bunga, Makassar, South Sulawesi	TOWNLAND was commissioned to undertake the Conceptual Master Planning and Site Planning for a new 800 ha reclamation area in Tanjung Bunga, Makassar, the fastest growing City in Eastern Indonesia. Tanjung Bunga in terms of its size and strategic location is considered as the new integrated "City Centre" with more contemporary urban structure, yet maintaining a pleasant spatial experience. The overall reclamation area is being designed to maximize waterfront frontage and scenic views, thereby significantly uplifting the land value.	PT. Gowa Makassar Tourism Development, Tbk and PT. Lippo Karawaci, Tbk	TOWNLAND	4.5	2015
Conceptual Master Planning for 700 ha of Land and Site Planning for 100 ha of Land in Padang, West Sumatra	TOWNLAND was commissioned to undertake the Conceptual Master Planning and Site Planning for a new 700 ha reclamation area in Padang to incorporate low and medium density residential development, two tourism waterfront anchors, a CBD extension area and extensive areas for recreation. The City underwent a severe earthquake in 2009 and suffered from a corresponding tsunami. It is therefore a major challenge to plan for a waterfront development which will gain back the public's confidence in the City's future growth on the waterfront. In this regard, much attention was given to adopting best practice earthquake and tsunami mitigation strategies from around the World in the design of the Project. In addition, emphasis was given to establishing an innovative development structure that capitalises on the waterfront in order to uplift property values and to integrate the Development with the existing City, including the old Dutch Quarter, Chinatown, the Tourist Harbour, the famous Mentawai Island and most importantly Padang's CBD.	PT. Padang Indah City and PT. Lippo Karawaci, Tbk	TOWNLAND	4.5	2015
Preliminary Conceptual Master Planning for ±329 ha of Land in Karang Joang, Balikpapan, East Kalimantan	TOWNLAND was commissioned to undertake Preliminary Conceptual Master Planning for a Township development at Balikpapan, an emerging City in East Borneo. The Development Concept focused on utilising the exciting views of an existing Golf Course as its main competitive advantage, in order to create the first Golf Resort Township in the City. Drainage was a key issue to be solved in the design process as the Site is crossed by more than a dozen small creeks.	PT. Ciputra Karya Mandiri	TOWNLAND	2	2015
Preliminary Conceptual Master Plan for ±4,700 ha of Land at Rempang Island, Batam	TOWNLAND was commissioned to prepare Conceptual Land Use Options, a Preliminary Conceptual Master Plan, Development Benchmarks and Parametres for a New Town of nearly 5,000 ha of land on Batam Island. TOWNLAND envisioned an Integrated and Comprehensive New Town with significant industrial and tourism opportunities known as "Rempang City," and featuring a New Township for 250,000 residents, an Inter-Modal Tourism Destination, Industrial & Technological Parks, Business Districts, Residential Estates, upscale Resorts, small Ports and a Private Airport. A Key consideration in planning for the Site was the protection of the Island's beautiful mangrove forests.	PT. Rempang International Resort	TOWNLAND	2	2015
Conceptual Master Planning for ±13 ha of Land at Parung Serab, Ciledug, Tangerang	TOWNLAND was commissioned to prepare a Conceptual Master Plan for a Residential Estate in southern Greater Jakarta, in an area predominantly known as a "dormitory" town. To be able to compete with surrounding developments, a high quality spatial concept was proposed with a focus on maintaining compatibility with identified target markets.	PT. Conceptual Master Planning for ±11 ha of Land at Ciputra Manado, North Sulawesi	TOWNLAND was commissioned to prepare a Conceptual Master Plan for a residential enclave at Manado, the Capital City of North Sulawesi Province. The Site featured a unique character with extreme topography, picturesque views of distant mountains and close proximity to a strategic regional road intersection. The Master Plan sought to create a distinct and exclusive residential compound over hilly terrain, that would stand out amongst other competing developments.	PT. Ciputra International	TOWNLAND	3	2015
Landscape Design for ±0.78 ha of Land at Holiday Inn and Suites In Jl T.B. Simatupang, South Jakarta	TOWNLAND was commissioned to undertake comprehensive Landscape Design Services for the Holiday Inn in South Jakarta. TOWNLAND's Services included Conceptual Landscape Design through to the Tender Documentation stage and Periodic Site Inspections during the Construction Period. The Project included the design of a large open space area which can be utilised as an outdoor wedding lawn and specialty restaurant as well as the design of the soft perimeter boundaries of the Site. The design theme adopted was one of modern urban indulgence and lush tropical landscape elements were used throughout.	PT. Bina Srikandi Propertama	TOWNLAND	9.5	2015
Landscape Design of Taman Simpruk, Lippo Cikarang, West Java	TOWNLAND was commissioned to prepare Conceptual Landscape Design, Schematic Landscape Design, Landscape Design Development, Landscape Design Tender Drawings and Implementation Specifications for the streetscapes and main gateway of this green and high-density integrated Mixed Use Development, which will be Surabaya's first comprehensive Satellite Business District outside its CBD. The Satellite Business District will include a Government Centre, Offices, a Business-to-business Complex, Hotels, an Education Hub, Apartments and other urban residential typologies. The Landscape has been designed to integrate the Development and is based on a tropical design style. The style is characterized by sequential lengths of simple, clean and linear forms that are juxtaposed by decorative focal points with resort-like characteristics and vivid tropical plants. Designed for modern urban living, the streetscapes provide public green facilities and amenities such civic gardens, dedicated and shared bicycle lanes, outdoor gathering hubs and jogging lanes. This urban landscape also plays an important role for the overall township identity.	PT. Lippo Cikarang Tbk.	TOWNLAND	3	2015
Landscape Design of Private House (0.13 ha of Land) in South Jakarta	TOWNLAND was commissioned by the CEO of the Samali Group to undertake Landscape Design Services for the extension of his private residential dwelling in South Jakarta. TOWNLAND's design comprised of the beautification of the existing gateway and porte-cochere as well as the landscape design of the extension area featuring an Outdoor Swimming Pool, an Event Lawn and a Fruit and Herb Garden. TOWNLAND's Services included Conceptual Landscape Design and Schematic Landscape Design. The design integrated a royal classical Javanese style with lush tropical planting.	PT. Landscape Design for ±0.8 ha of Land for Apartment Complex at Pantai Indah Kapuk, North Jakarta	TOWNLAND was commissioned to undertake comprehensive Landscape Design Services for a high-end Apartment Complex in Pantai Indah Kapuk, North Jakarta. The Project consisted of two apartment towers. TOWNLAND's Services included Conceptual Landscape Design through to the Tender Documentation stage and Periodic Site Inspections during the Construction Period. The Project focused on the Swimming Pool Area and a Terraced Garden which supported leisure, sport and play facilities. The design themes adopted sought to integrate a modern urban setting with a lush tropical landscape as an oasis for inner city living.	PT. Mentari Bukit Makmur	TOWNLAND	9.5	2015
Conceptual Master Planning for ±200 ha and Preliminary Conceptual Master Planning for ±250 ha of Land of Summarecon Makassar, South Sulawesi	<p>TOWNLAND was commissioned to prepare a Conceptual Master Plan for a Township development at Makassar, the Gateway City of Eastern Indonesia. The Township features a 17 ha CBD superblock at its core and Residential Units for 25,500 residents including Landed Houses and Multi-storey Apartments. Facilities have been designed for its residents and the larger Makassar catchment and include a Shopping Mall, Lifestyle Centre, Offices, Schools, University and Hospital. All facilities and public areas are well connected and integrated with a sophisticated multi-modal public transportation system. The Design for the Township sought to take best advantage of its proximity to the International Airport and City Centre. Other important considerations were the integration of a planned regional road and future railway lines to create a Transit Oriented Development (TOD) concept and the preservation of Mangrove Forest along the riverbank.</p> <p>TOWNLAND was also commissioned to prepare a Preliminary Conceptual Master Plan for a ±250 ha land bank directly north of Summarecon Makassar New Town (200 ha) as Phase 2 of the Development. The Site has 1.2 km ocean frontage and a 2.8 km river and garden frontage, making it ideal for a resort-like urban environment. Summarecon Makassar Phase 2 will provide housing for 11,800 residents in 1,200 Landed Houses and 6,700 Sea-side Apartment Units. A 50-storey landmark Hotel, Exhibition Centre, and Lifestyle Centre will serve as the anchor facilities. A continuous greenbelt linkage from the river to the ocean front structures the overall Development and links with Summarecon Makassar Phase 1 Development. The 4 km greenbelt links ocean, river and garden landscapes and will include various types of Hiking, Jogging and Cycling Trails in Nature Areas, Thematic Gardens, Sports Areas and an Ocean Promenade.</p>	PT. Review, Advice and Inputs to Landscape Design Aspects for ±5.7 ha of Land at The Pertamina Energy Tower, Jakarta	TOWNLAND was to act as the Local Landscape Architect for the development of a national flagship Office Complex for the Pertamina Energy Group. Upon development, the Project will be the third tallest building in the World. TOWNLAND's Services covered Review, Advice and Inputs to Landscape Design Aspects from Conceptual Landscape Design through to the Tender Documentation stage and Periodic Site Inspections during the Construction Period. The Project comprises the Pertamina (national state owned oil company) Headquarter Building, Pertamina Pavilion, a Central Energy Plant, a Mosque and a Field House. The design themes adopted were inspired by the diversity of geography, environment and culture of the Indonesian archipelago.	Thomas Balsley Associates	Thomas Balsley Associates	19	2015
Preliminary Conceptual Master Planning for ±2.5 ha of Land at Padang-Padang Bay, Labuan Sait, Bali	Situated on top of a 50 metre cliff is the "Seven Heaven" Luxury Resort, PT Danau Winata Indah's newest Luxury Resort in Padang-Padang Bay, Bali. TOWNLAND was appointed to prepare the Preliminary Conceptual Masterplan for this exciting and World Class Site, and developed a Plan that not only capitalizes on the magnificent views but also creates an entrance and arrival experience for guests of the future development at the base of the cliff. The Resort is envisioned as a high quality Villa and Condotel Development, offering 336 5-star Rooms, 8 Penthouse Suites and 8 Resort Villas, all in a lush tropical setting with extensive waterscape to stimulate the senses and increase the guest's experience. The design delivers a unique guest and visitor arrival experience, orients the building to maximize views, offers a programme and function allocation which ensures privacy and exclusivity and utilises the Site's intrinsic character to maintain and frame the spectacular views. The Plan incorporates a host of World Class amenities to pamper visitors, and includes a "Hanging Tree" Restaurant, a Scenic Sunken Pathway, a Floating Lounge & Bar, a Cliff Restaurant, a Cave Spa, a Terraced Swimming Pool, and an Infinity Pool right on the Cliff's edge. The extensive waterscape includes Reflection Pools, Water Curtains and Fountains and, at strategic locations, Viewing Platforms which enable guests to capture views of the sunset while reflecting light from the surrounding water features adds an additional magical sparkle. Landscape Design for ±1.62 ha of Land at Resort Hotel at Ungasan, Bali	TOWNLAND was commissioned by the Samali Group to undertake comprehensive Landscape Design Services for the design of the 5-star Ammi Ungasan Resort Hotel in Ungasan, Bali. The Project consisted of Condotel Towers, Private Villas, Restaurants, a Chapel, a Spa and a Beach Club. The Site is located next to a cliff with a challenging contour providing up to 80 metre level differences. An impressive Entrance Gateway was proposed into the Hotel towards the opening of the cliff and served as the main welcoming feature into the hotel lobby. The landscape design also focused on the communal open space areas including the Swimming Pool, Swimming Ponds, Cave Restaurant and other Leisure Facilities. A breathtaking cliff trail was also proposed to connect to the Beach Club within the Hotel. TOWNLAND's Services included Conceptual Landscape Design through to the Tender Documentation stage. The Concept aimed to integrate the natural setting of the Site as the valuable design resource with modern resort indulgence.	PT. Kharisma Sukseslestari	TOWNLAND	3.5	2015
Conceptual Landscape Planning and Design Guidelines for CitraLand Waterfront City (±106.53 ha) in Makassar, South Sulawesi, Indonesia	TOWNLAND was commissioned to prepare Conceptual Landscape Planning and Design Guidelines for CitraLand Waterfront City, a 106.53 ha Township in Makassar. The Project is one of the largest reclamation projects in Indonesia and is proposed for a mix of facilities which will form a new icon for Makassar. The City is divided into three landscape development themes: (i) Mangkasara Gateway - comprises an area connecting the Main Boulevard and the Main Public Open Space and is proposed to adopt a modern aesthetic landscape character, which is accentuated with elements of local culture; (ii) Maritime Mandala – comprises the Commercial and CBD area of the City and a unique and hi-tech landscape character is proposed, which draws on elements of Makassar's maritime history; and (iii) Coastal Terrace – utilises a landscape theme with a strong coastal character and capitalises on direct open views to Losari Beach.	Ciputra Yasmin JO (Ciputra Group)	TOWNLAND	3	2015
Comprehensive Landscape Design Services for the SpringLake Apartment Complex in Summarecon Bekasi, Bekasi, West Java	TOWNLAND was commissioned by the Summarecon Group to undertake comprehensive Landscape Design Services for the SpringLake Apartment Complex in Summarecon Bekasi. The Development consists of four Apartment Towers located next to an existing Lake. TOWNLAND's Services included Conceptual Landscape Design through to the Tender Documentation stage. The Project focuses on large open space areas on the Podium Deck between the Apartment Towers, which serve as spaces for the Swimming Pool and other Leisure, Sport and Playground Facilities. The Project also focuses on designing liveable open space areas along the waterfront of the Lake, where various public facilities are located. The concept of the Water Sensitive Urban Design has been introduced to the Project for a more sustainable development approach.	PT. Summarecon Agung Tbk	TOWNLAND	6	2015

Preliminary Conceptual Master Planning for ±40 ha of Land at Muara Baru, North Jakarta	<p>PT HK Realtindo together with Perum Perikanan Indonesia commissioned TOWNLAND to prepare a Preliminary Conceptual Master Plan to develop a reclamation area in Muara Baru into an Integrated Marine Industry Development. The main functions to be provided for in this area revolve around the Marine Industry and its supporting functions, including residential and entertainment facilities. A clear segregation and circulation are proposed between Industrial Areas and other functions to improve each other's privacy and functioning. A Waterfront Living District is proposed in a more secluded area and utilises the sea-frontage to generate views and create a spacious feeling. The Industrial Area utilizes the direct access from the ocean to allocate a port component, which also connects to an existing port.</p> <p>The Waterfront Living District consists of High End Apartments along a wide Promenade that provides a unique spatial experience; from an ecological floating park to an artificial beach that ultimately connects to the Maritime Tourism Destination Area. A new modern fishery market is also developed as a unique and differentiating commercial product and provides a special characteristic to the Development.</p>	PT HK Realtindo	TOWNLAND	3	2015
Landscape Design of The Springlake 3, Bekasi, West Java	<p>TOWNLAND was commissioned to prepare Conceptual Landscape Design for Springlake 3, an extension of the Springlake compound in Summarecon Bekasi. The Development comprises of a Mixed Use area of 27,486 m², combining residential apartments and a shopping arcade along the main street.</p> <p>The Landscape Design focuses on creating a human-scale environment completed by high quality landscape, with Elegant Retro as the overriding design theme, which creates a contrast between organic and geometric shapes. The area includes 1 signature apartment tower, 2 other apartment towers, and 1 tower of service apartments, integrated with a signature 100 metre shared semi-private pool. As a shared featured facility, the semi-private pool is designed to be accessible by all four towers through a card accessed gate.</p> <p>The lakeside area is utilized as both a semi-public and a private area. The semi-public area is designed with community spirit for all ages with a lakefront pocket plaza and a playground area. The private area is designed as an outdoor lounge for residents with exclusive elevated views to the lake. The planting composition comprises of lush tropical plants to create a comfortable and liveable environment.</p>	PT. Summarecon Agung, Tbk.	TOWNLAND	3	2015

Landscape Design for ±2.68 ha of Land at MNC Media Centre, Jakarta, Indonesia	The MNC Group is upgrading its MNC Media Centre to international standards, suitable for its image as the largest media group in South East Asia. The overall development includes the renovation of several existing towers and the introduction of new towers, including MNC Group's Headquarters and the Park Hyatt Hotel Jakarta where all facilities will be located in a park-like media campus with the landscape as the integrating element. TOWNLAND was commissioned to prepare the Conceptual Landscape Design, Schematic Landscape Design, Landscape Design Development, Landscape Design Tender Drawings and Implementation Specifications, Tree Survey Report, Periodic Site Inspection during Landscape Construction and Periodic Site Inspection during Maintenance for the Project. The landscape for this media campus has been designed for broadcasting activities in a variety of gardens that will be conducive for creative thinking and outdoor corporate activities. The landscape has been designed to scale with the towers and form paved and green open plazas. Soft landscape treatments introduced are tropical, vivid and low-maintenance, while organic lines create relaxing ambiances. Art works and contemporary water fountains bring character to focal points.	PT. MNC Land Tbk.	TOWNLAND	3	2016
Landscape Design for ±1.9 ha of Land at Streetscape and Main Gateway Area in Gunung Anyar	TOWNLAND was commissioned to prepare Conceptual Landscape Design, Schematic Landscape Design, Landscape Design Development, Landscape Design Tender Drawings and Implementation Specifications for the streetscapes and main gateway of this green and high-density integrated Mixed Use Development, which will be Surabaya's first comprehensive Satellite Business District outside its CBD. The Satellite Business District will include a Government Centre, Offices, a Business-to-business Complex, Hotels, an Education Hub, Apartments and other urban residential typologies. The Landscape has been designed to integrated the Development and is based on a tropical design style. The style is characterized by sequential lengths of simple, clean and linear forms that are juxtaposed by decorative focal points with resort-like characteristics and vivid tropical plants. Designed for modern urban living, the streetscapes provide public green facilities and amenities such civic gardens, dedicated and shared bicycle lanes, outdoor gathering hubs and jogging lanes. This urban landscape also plays an important role for the overall township identity.	PT. Cakrawala Sinar Mulia	TOWNLAND	3	2016
Landscape Design for ±3.1 ha of Land at Low Rise Apartments in The Springs, Summarecon Serpong, Tangerang	TOWNLAND was commissioned by the Summarecon Group to undertake Landscape Design Services for a low-rise apartment complex (Rainbow Springs CondoVillas) in Summarecon Serpong. The Project comprises of 3.1 ha of rolling green open spaces, thematic gardens and lush natural settings. The landscape design for this Development has been envisaged as a lush lake-side residential neighbourhood which combines the convenience of living in a modern villa estate with sophisticated outdoor facilities in a luxurious first class apartment compound. TOWNLAND's Services included Conceptual Landscape Design through to the Design Development stage.	PT. Summarecon Agung, Tbk.)	TOWNLAND	4	2016

Soft Landscape Beautification for ±5.2 ha of Land at The Main Boulevard in Summarecon Serpong, Tangerang, Banten	TOWNLAND was commissioned by the Summarecon Group to undertake comprehensive Landscape Design Services for the beautification of the Main Boulevard in Summarecon Serpong. TOWNLAND's Services included Conceptual Landscape Design through to the Tender Documentation stage and Periodic Site Inspections during the Construction Period. The Project comprised of the beautification of roadside berms, medians and important nodes such as roundabouts and gateways. Design solutions were proposed to overcome the issue of double ownership in some areas on the Site.	PT. Serpong Cipta Kreasi	TOWNLAND	6.5	2016
Landscape Design of Nifarro Apartment (1.24 ha) in South Jakarta	TOWNLAND prepared Conceptual Landscape Design, Schematic Landscape Design and Landscape Design Development, and undertook Construction Inspections for the Nifarro Park Development in South Jakarta. The Development is an Integrated Mixed Use Development by PT. Sekar Artha Sentosa, a part of the Samali Group. The Site includes an Office Tower, Apartments and a future Hotel and has been designed as an integrated modern tropical landscape. The target market of this Development is the Indonesian upper-middle class and the employees of the Company who will work in the Office Tower itself. The Development comprises an integrated open plaza in between the buildings, a semi-outdoor restaurant, a sitting out and display platform and an at-grade parking lot. The landscape is designed with an urban style geometry which uses straight lines, simple forms and structural features to create a modern welcoming impression for residents and visitors. The planting idea is based on a tropical monochromatic palate, which uses lush-broad leaved plants with diverse green colours and hints of neutral white, to create the atmosphere of a professional and integrated Office and Apartment Complex. Review and Preliminary Conceptual Land Use Planning & Panel Review Services for ±900 ha of Land at Pantai Indah Kapuk 2 (PIK2) Tangerang, West Java	<p>Pantai Indah Kapuk 2 is a highly successful Township Development, for which TOWNLAND was commissioned to prepare a Conceptual Master Plan by leading Developer, PT Kukuh Mandiri Lestari (a subsidiary of Agung Sedayu Group), in 2013. In 2016, in response to changing market conditions, TOWNLAND was asked to review and revise the Conceptual Master Plan to accommodate a renewed demand for commercial development plots.</p> <p>TOWNLAND worked in close collaboration with engineers, traffic consultants and CLIENT to review and revise the Conceptual Master Plan. Key features and principles contained in the original Conceptual Master Plan, including minimal interruption of the 4 km long Central Park; an integrated green and blue network; pedestrian oriented development; and public transport systems were further optimized and enhanced. The Preliminary Conceptual Land Use Plan was further diversified from what was originally a primarily suburban and low-rise residential development, to contain a range of commercial, Mixed Use and residential developments, including waterfront highrise apartment complexes, integrated public amenities, as well as large 'big box' commercial developments.</p> <p>Upon completion of the Review and Preliminary Conceptual Land Use Planning, CLIENT engaged TOWNLAND to develop the Urban and Landscape Design Guidelines for the Township.</p>	PT Kukuh Mandiri Lestari (a subsidiary of Agung Sedayu Group)	TOWNLAND	3	2016
Summarecon Bandung Entrance Gateway (3.77 ha), West Java, Indonesia.	<p>TOWNLAND was commissioned to prepare Conceptual Landscape Design for the Entrance Gateway of Summarecon Bandung by a subsidiary of PT. Summarecon Agung, Tbk. The Entrance Gateway is planned to be a new City landmark, which represents the celebration of an inspiring 40 year voyage of Summarecon as one of the most renowned Property Developers in Indonesia. It serves also as an icon to Bandung itself.</p> <p>Summarecon Bandung is a part of the Bandung Technopolis, an iconic mega project in Bandung. The Development strives to reflect the local Vision of the City and transform it into a Central Business District for techno-entrepreneurs and also includes the new Bandung City Government Centre. The man-made lake features a green hillside in front of it to become one of the main features of the entrance gateway. Two large structures at 50 metres tall represent a 'gateway' that brings people into Summarecon Bandung. The row of dynamic poles represent the 40 years journey of Summarecon Group.</p>	PT Mahkota Permata Perdana (PT. Summarecon Agung, Tbk)	TOWNLAND	8	2016

Landscape Design for Sadiya Residence at Ammi Uluwatu (3.4 ha), Bali, Indonesia	<p>TOWNLAND was commissioned to prepare Landscape Design for the Sadiya Residence at Ammi Uluwatu, Bali by PT Indo Karya Teknik. The Project is located on the South-Western tip of the Bukit Peninsula in Bali. Although the Site doesn't have a direct access to the beach, it has views over beautiful scenery. Located above a rocky hilltop, Sadiya displays the essence of Bali inside a compound through the design of its architecture and landscape elements.</p> <p>The creation of a Balinese Village is the key design idea for the architecture of the building as well as for the overall landscape design. The luxurious Beach Pool and the exotic Swimming Pond in the middle of the compound are designed for the guests who want to enjoy a beach lifestyle, even though they are staying on a rocky hilltop. A strong axis is formed from the drop off area to the 'Kul-Kul' tower and becomes one of the main focal points of the spatial arrangements within the compound. Beautiful paddy fields can be seen from the drop off area, which is terraced down to the pool with gazebos along a foot path in between the fields. A private Lagoon Pool is also designed for buyers who need total privacy and seclusion. Lush tropical landscape elements strengthen the feeling of a Balinese Village throughout the Project.</p>	PT. Indo Karya Teknik	TOWNLAND	3	2016
Conceptual Master Planning for ±2,600 ha of Land and Urban Design for its ±600 ha Core Area in Tangerang, Banten Province, Indonesia	<p>This Conceptual Master Plan creates the framework for long-term development of a ±2,600 ha integrated Township and self-sustaining Satellite City to Jakarta that includes not only residential and commercial facilities, but also hotels, a convention centre and light industrial and R&D developments. This was an invitation-only International Design Competition and TOWNLAND won SECOND PRIZE.</p>	PT CFLD Indonesia Real Estate Development	TOWNLAND	3	2016
Conceptual Master Plan for a Resort Project on 2 ha of Land in Puncak, Bogor Regency, West Java, Indonesia	<p>Puncak Resort, located in Bogor Regency, West Java, Indonesia, is planned as a Villa and Hotel Suite Destination. It comprises 2 ha of land with approximately 14,000 m² GFA. The Land Uses are categorized into 4 main typologies: Retail Shophouses (Ruko), Hotel, Villa and Resort Gardens.</p> <p>Puncak Resort will have 101 Hotel Rooms, 15 Private Villas and 12 Retail Shophouses (Ruko). There will be 2 types of Hotel Rooms: Deluxe at 32 m² and Suites at 48 m². There will be also 2 types of flexible Private Villas: Small Flexible Villas with a lot size of 252 m² and Large Flexible Villas with a lot size of 540 m². Villas have valley, mountain and garden views. The Retail Shophouses (Ruko) are 2 storey buildings with a Gross Floor Area of 150 m² each.</p> <p>The design concept of the Development offers unique experiences and extravagant resort ambiances, for both Domestic and International tourists. Attractive yet picturesque spatial experiences have been developed with various themes for the Development products including a Middle-Eastern atmosphere for the Retail Shophouses (Ruko) and Hotel area, a lush tropical ambience within the Resort Garden, and a green modern feeling for the private Villas.</p>	Mr.Fouad Al-Nomani	TOWNLAND	5	2016

Conceptual and Schematic Landscape Design (22 ha) at Summarecon Makassar, South Sulawesi, Indonesia	<p>TOWNLAND was commissioned by a subsidiary of PT. Summarecon Agung to prepare Conceptual Landscape Design and Schematic Landscape Design for the Entrance Gateways, Main Boulevard and Residential Boulevards of Summarecon Agung Tbk's first Township development outside Java. This Township, for which TOWNLAND previously prepared the Conceptual Master Plan, will comprise 450 ha of land near the Sultan Hasanuddin International Airport, with direct toll road access to the CBD of Makassar. The Entrance Gateways and Main Boulevard and other open space areas jointly comprise a landscape area of 22 ha.</p> <p>Summarecon Agung Tbk has decided to develop and implement this 22 ha area as the first phase of its construction works at Summarecon Makassar. This will be followed by the construction of a Marketing Gallery, Clubhouse and the first Residential Development Cluster. The toll road entrance adopts a city-scale Archway in a modern interpretation of the European Classic style.</p> <p>The landscape strategy adopted for the Project has selected high quality soft landscape materials featuring canopy trees along the Main Boulevard, vast Lawns and harmonious Tropical Planting Arrangements which enhance the feeling of a tropical green atmosphere. Flowering and shade trees are used along the Residential Boulevard as well as along Local Roads. Fast-growing and easy maintenance species have been chosen to compliment the Classic European concept of the architecture of the Marketing Gallery, Clubhouse and the Residences.</p>	PT Sinergi Mutiara Cemerlang (PT. Summarecon Agung)	TOWNLAND	9	2016
Existing Valuable Tree Survey and Tree Design Guidelines For ±20 ha of Land of Summarecon Bali	<p>Summarecon Uluwatu will be an Integrated Resort comprising of four Resort parcels. It is located in the prime tourism destination of Uluwatu, Bali and has outstanding views to the Indian Ocean. The Site has a natural forest with numerous medium and large trees with a high conservation and aesthetic value that will be protected during land preparation and clearing. TOWNLAND carried out the tree survey and assessment of valuable trees and prepared preservation, transplantation and tree design guidelines. Preservation criteria included: unique architectural tree form, medium to mature size, health and rare species.</p> <p>The Valuable Tree Preservation and Transplantation Guidelines are written to provide guidance to protect, maintain and/or transplant the preserved trees during the pre-construction and construction stages. The Tree Design Guidelines for Main Boulevard and Open Spaces provide standard guidance for planting and maintenance practices in the initial development areas during the marketing stage as well as in the future development stages.</p>	PT. Conceptual Master Planning for ±25 ha of Land (SD Inpres) and ±5 ha of Land (Flamboyan) at Rancamaya Golf Estate, Bogor, West Java	<p>Rancamaya Golf Estate is a Residential Estate and Resort located in Bogor, West Java. The Developer, PT. Suryamas Dutamakmur, Tbk appointed TOWNLAND to prepare a Conceptual Master Plan for its Rancamaya Extension (Kingsville), comprising 25 ha of land (SD Inpres) and for 5 ha of land (Flamboyan) representing the first vertical living cluster at the Rancamaya Golf Estate.</p> <p>The Kingsville is envisioned as a high quality residential area which capitalises on its strategic location and provides a range of product offerings; including clusters of Residential Landed Houses, a Club House, a Leisure Park, Commercial Lots, Shop Houses and an International School. The green and blue systems within clusters offer a comprehensive connection for pedestrians, while thematic parks within each cluster add to the overall ambience of the Project.</p> <p>The Flamboyan will become Rancamaya's Pilot Project for delivering luxury condo villas. The five-storey towers all offer views to Mount Salak and are set on top of natural hilly land with an existing stream flowing through the Site. The Development aims to provide exclusive low-density living in tranquil surroundings.</p> <p>The Conceptual Master Plan for both Sites integrates natural features into the Development and focuses on pedestrian experiences through the introduction of major green pathways allowing people access to the entire Site on foot.</p>	PT. Suryamas Dutamakmur, Tbk	TOWNLAND	3	2016
Landscape Design for PAL City Mixed Use Development in Palmerah, Jakarta	<p>TOWNLAND was commissioned to prepare Conceptual and Schematic Landscape Design, Landscape Design Development, Landscape Tender Drawing and Specifications, Periodic Inspection and Monitoring During Construction for PAL City (14,870 m² Landscape Area), a Mixed Use Complex comprising a Shopping Mall, a Hotel and Apartments in Palmerah, Jakarta. The landscape spaces are located on the ground floor, podium and on sky garden levels.</p> <p>The Project is designed for the mid-end young family market and is proposed to have a modern character. The Landscape Design is characterized by bold urban lines and an urban geometry that extends from the architecture into the landscape, where the lines form grand and luxurious open spaces. Sleek modern details strengthen the simple and yet elegant landscape design, and are in harmony with the modern architecture.</p> <p>The carefully planned outdoor spaces feature a host of outdoor facilities including a Swimming Pool, a Kids' Pool, Children's Playgrounds, a Jogging Track, a Sky Garden, an Outdoor Lounge and Open Lawns catering to social activities, sports and leisure.</p>	PT.Arta Prima Properti (Orang Tua Group)	TOWNLAND	8	2016

Conceptual Master Planning for ±200 ha of Land at Malang, East Java	<p>TOWNLAND was commissioned to prepare a Conceptual Master Plan for a new ±200 ha Integrated Township Development located on the flanks of Mount Bromo, East Java, Indonesia. This Township is envisioned to become a new subcentre for the growing City of Malang, one that capitalizes on the proximity of the future toll road to Surabaya and its strategic location near universities and for tourists that want to visit and explore Mt. Bromo.</p> <p>The Development will accommodate approximately 37,500 inhabitants; 1,000 residents living in 400 landed houses and 36,500 residents living in multi-storey apartments. Driving the success and differentiating it from its competitors are the Project's two commercial cores, which each have a unique theme. The first is a 'Resort Lifestyle Centre' which is focused on tourism and entertainment and consists of functions such as a Resort Hotel, a Convention Hall, a Theme Park, a Water Park, an F&B Centre and various outbound facilities. The second core is the 'Central Business District' which is envisioned to become a generator for regional economic development, and provides diverse functions such as a Lifestyle Mall, Retail Shops, Offices, Hotels, a Hospital and an International School, as well as a Business Park.</p> <p>The two unique cores, together with the ample provision and mix of residential development, provide the framework for the Project to become a new landmark development within Malang, an Integrated subcentre and a Satellite Township for Malang.</p>	PT. Project	Project Description	Client	Lead Consultant	Duration of Project (months)	Completed (year)
Preliminary Land Use Planning for ±100 ha of land at Benoa Bay, Bali	<p>TOWNLAND was commissioned by PT. Nusa Mega Penida for a Preliminary Land Use Plan Study for the development of a new reclamation island within Benoa Bay. The objective of the assignment was to, in a very short timeframe, develop a Preliminary Land Use Plan that could serve as an alternative for a large reclamation development proposed within Benoa Bay, and which had received significant public opposition.</p> <p>The Preliminary Land Use Plan responds to CLIENT's Brief and general tourism trends within Bali by providing an integrated hub for marine transport and its ancillary facilities – the main driver for development is the allocation of a 17 ha Cruise Terminal, suitable for berthing large International cruise ships with up to 3,000 passengers. Supporting this main Cruise Terminal, the Preliminary Land Use Plan also proposes to allocate a fast-ferry terminal to provide links and connections to the various Islands around Bali, as well as a leisure yacht marina. To support the operations of the marine transport node, various public and commercial land use plots are proposed, that can be further detailed and zoned in future stages. A 100 m wide mangrove buffer is proposed to mitigate the impact of the Development of this reclamation.</p>	PT. Nusa Mega Penida	TOWNLAND	2	2016
Conceptual Master Planning for ±7.4 ha of Land at Makassar, South Sulawesi	<p>Tanjung Layar Lagoon is envisioned as a new benchmark for high quality waterfront living in Makassar, South Sulawesi. TOWNLAND was commissioned by PT. Creative Softhouse to develop a Conceptual Master Plan to capture the development potential of this highly strategic waterfront Site close to the city of Makassar. The region is well-known for tourism development and is home to various high-end and boutique hotels. Based on extensive site and regional research and various discussions with CLIENT, TOWNLAND identified the opportunity for development of a Residential Destination. The Conceptual Master Plan allocates a range of high-end residential development products, from villatels to mid-rise high-end apartments and a hotel, and is supported by high-end boutique shophouses and an exclusive beach club.</p> <p>The proposed architectural style of the Development is inspired by its waterfront location. The 7.4 ha Site will contain a total Gross Floor Area of 230,000 sqm; while a site coverage of only 27% will ensure that there is ample space for playgrounds, gardens, water features and other public amenities.</p>	PT. Conceptual Master Planning for ±50 ha of Land at Agung Sedayu City, Kelapa Gading, Jakarta	<p>One of the last large undeveloped areas of land in North Jakarta, this 50 ha Phase 3 of Sedayu City has a development potential to become a high quality and sought-after Residential and Mixed Use Development. TOWNLAND was commissioned by Agung Sedayu Group to prepare a Conceptual Master Plan to unlock this potential. The resulting Conceptual Master Plan capitalizes on the strategic Site location, its proximity to existing residential developments and future City distributors. It responds to existing Site conditions and an existing Master Plan for already (partially) developed earlier phases of the Sedayu City Project, by integrating its road and open space network and proposing complimentary land uses. A commercial shop-lined boulevard forms a central spine that integrates and connects the Development with earlier phases of Sedayu City, while the “Crown Jewel” for the Project is a proposed pedestrian oriented & outdoor retail and F&B Lifestyle Centre that will service not only the future residents, but also adjacent developments. Three residential clusters, with a total of 897 units and one large shared Clubhouse, are separated by an integrated open space and green network that provides pedestrian linkages to an existing river front park.</p>	PT. Citra Abadi Mandiri (Subsidiary of Agung Sedayu Group)	TOWNLAND	5	2016
Comprehensive Landscape Design for the Iris Residence Apartments (1.1 ha) in Bandengan, West Jakarta	<p>TOWNLAND was commissioned to prepare Conceptual and Schematic Landscape Design, Landscape Design Development and Landscape Design Tender Drawings and Implementation Specifications for the Iris Residence in West Jakarta, Indonesia. The Project is a high-end apartment development with comprehensive community facilities and amenities. Located near the Jakarta Inner Ring Road, the Project is designed for both Indonesian Nationals and Expatriates and features an Olympic-size Swimming Pool, Children’s Playgrounds, Outdoor Cafes, a Barbeque Area and Thematic Gardens.</p> <p>The Landscape Design creates an intimate atmosphere with a clean and modern look, setting a new trend for quality living in West Jakarta. The soft landscape sets the scene for a luxurious green oasis inside a modern vertical living compound, which extends through the podium floor to the sky gardens.</p> <p>The Ground Floor is designed for Commercial Use with a host of outdoor facilities including an AI-fresco Dining Area with an Open-air Stage and Mini Amusement Park for kindergarten children. The Podium Floor features various outdoor activity areas, creating a space for its residents to play and spend quality time with friends and family members. This includes a 50 metre Olympic-size Swimming Pool and Kids’ Pool, a Children’s Playground and a Barbeque Area.</p>	PT. Darwin Indonusa Hutama	TOWNLAND		2016

Landscape Design for the Primrose Condovilla Low Rise Apartment Complex (6 ha), Bekasi, West Java	<p>TOWNLAND was commissioned to prepare Conceptual and Schematic Landscape Design, Landscape Design Development and Landscape Design Tender Drawings and Implementation Specifications for the Primrose Condovilla residential cluster, developed by Summarecon Bekasi on 6 ha of land. Some 60% of the land area is dedicated to landscape and garden areas. The Apartment Buildings of 6-storeys extrude in between open spaces and within lush tropical natural settings.</p> <p>Using a theme centred around the creation of tropical gardens, the landscape area features four thematic parks with a range of community functions, including a Pedestrian Walk which connects the Parks and Jogging Track around the Gardens.</p> <p>Amenities provided include a Barbeque Area, a Children's Playground, Cabanas, an Amphitheatre, and a Multipurpose Lawn. Four Themed Parks are connected to each other by a Pedestrian Walk giving residents easy access to open space. The landscape design also features two Educational Gardens which include a Fruit Garden with edible plants (mango, rose apple, and herbs) and an Aromatic Garden featuring scented plants. The Clubhouse features a Boutique Swimming Pool and a Kids' Swimming Pool with panoramic lake views.</p>	PT. Summarecon Agung, Tbk.	TOWNLAND		2016
Landscape Design of The SpringLake View, Bekasi, West Java, Indonesia.	<p>TOWNLAND was commissioned to prepare Conceptual and Schematic Landscape Design, Landscape Design Development, Landscape Tender Drawing and Specifications and Periodic Inspection and Monitoring During Construction for several development stages of The Springlake View in Summarecon Bekasi. The SpringLake View is a Mixed Use area of 0.78 ha, combining Apartments and a Shopping Arcade along the Main Street. The landscape design approach adopted focuses on creating a human-scale environment completed by high quality tropical landscapes for the various residential units.</p> <p>The Public Open Space provides a host of amenities which include Playgrounds, Swimming Pools, a Jogging Track and Fishing Decks. Various water sensitive urban design measures have been proposed to collect, treat and store surface water run-off.</p>	PT. Summarecon Agung, TBK	TOWNLAND	12	2016
Landscape Design of Main Gateway at Solo Baru, Solo, Central Java	<p>TOWNLAND was commissioned to prepare the Landscape Design of the Main Gateway and the Marketing Gallery Plaza of The Kahyangan in Solo. This Development, for which TOWNLAND previously prepared the Conceptual Master Plan, comprises of ±7 ha of land.</p> <p>The Landscape Design is inspired by the existing urban sculpture at the Main Gate, the figure of the Great Gatot Kaca from Javanese mythology. The Main Gateway serves as a linkage between the Development area and the City of Solo. A combination of tropical modern softscape and Javanese hardscape detail are proposed along the boulevard. Big canopy trees are chosen to enhance the concept of tropical green and the Main Gateway itself takes The Javanese Colonial style as its inspiration. The epoch story of Gatotkaca carved in the urban sculpture located on the roundabout in front of the Main Gateway area is highlighted to strengthen the Classical Javanese concept.</p>	PT. Preliminary Conceptual Land Use Planning for ±5,000 ha of Land at Tanjung Burung, Tangerang, Banten.	<p>Following the great sales success of Pantai Indah Kapuk 2, TOWNLAND was appointed by CLIENT to develop a Vision and Preliminary Conceptual Land Use Plan for the adjacent 5,000 ha area with the objective of creating an overarching Vision for the Pantai Indah Kapuk Megacity.</p> <p>The overall concept of the Development is driven by its proximity to the Soekarna-Hatta International Airport and is developed based on TOD principles, with various high density and differently themed core development districts. Each district contains a range of supplementary landuses and development functions - including residential, commercial, public facilities and entertainment, and can be developed independently. An integrated public open space network links all the various districts together and promotes walking and cycling, while in addition to the main LRT network, a secondary public transport network of busways links the various subdistricts to each other.</p> <p>This overall Aerotropolis Development, will have three uniquely themed core areas: PIK 2 as a CBD for Business, PIK 3 as an Entertainment City, and PIK 4 and 5 as Edu-Smart Cities. In addition, there is a future reclamation island which has been zoned a future seaport terminal, and is linked via freight rail to an inland port. As such, the Development is uniquely differentiated and offers a range of development themes and products that can entice and attract a wide range of investors and development partners.</p>	PT Kukuh Mandiri Lestari (a subsidiary of Agung Sedayu Group)	TOWNLAND	2	2017
Landscape Design for the Grand Dharmahusada Lagoon, Surabaya, Indonesia	<p>TOWNLAND was commissioned to prepare Conceptual Landscape Design, Schematic Landscape Design, Landscape Design Development and Landscape Design Tender Drawings and Implementation Specifications for the Grand Dharmahusada Lagoon, a superblock featuring Apartments and a Lifestyle Mall in East Surabaya. It provides a high quality living experience and also serves as a place for business activities. The landscape Vision of Grand Dharmahusada Lagoon is "Weaving nature into urban living, creating space as a Green Oasis".</p> <p>The landscape is designed as a place to encourage healthy lifestyles by providing social spaces and experiences within a variety of outdoor facilities. People will be able to wander into the spacious central open spaces, along the playful stream that leads to the Grand Lagoon, all enveloped by lush greenery. A central open space is directly connected to the commercial spaces of the Lifestyle Mall to enliven the superblock and to provide access to facilities. The podium level of the Apartment buildings feature swimming pools, a playground and sports areas exclusively provided for residents. Facilities are linked by lush tropical garden plants to provide shade.</p>	PT. PP Properti, Tbk.	TOWNLAND	12	2017

Pantai Indah Kapuk II – Modern Waterfront Lifestyle City (900 ha) in Tangerang, Banten	Pantai Indah Kapuk 2 (PIK2) is a strategic new Satellite Township near the Soekarno-Hatta International Airport. Following great sales success as one of Indonesia's most successful property developments in 2016, TOWNLAND was appointed by CLIENT to further revise, update and detail the Conceptual Master Plan for the +/-900 ha Pantai Indah Kapuk 2 Development, and to subsequently prepare Broad Urban Design Guidelines. Both Documents will provide the CLIENT, as Master Developer, with the necessary control documents to ensure that the implementation of the Project follows the Master Plan as envisioned – including its City wide integrated pedestrian and cycle networks, green and park spaces, waterfront residential and commercial areas and its definition of urban space through skyline planning, landmarks, plaza's and vistas.	PT Kukuh Mandiri Lestari (a subsidiary of Agung Sedayu Group)	TOWNLAND	6	2017
Review and Preliminary Conceptual Land Use Planning for ±118 ha of Land at Reclamation Island, Tangerang, West Java.	<p>Agung Sedayu's Riverwalk Island is one of Jakarta's most anticipated Development Projects. The reclamation Island off the coast of North Jakarta has long been planned and envisioned as a landed housing estate, however changing market requirements have caused Agung Sedayu to rethink their positioning and development of the Site. TOWNLAND was commissioned to carry out a Review and Preliminary Conceptual Land Use Plan to prepare a development alternative for consideration by CLIENT.</p> <p>Based on a broad-brush regional positioning analysis and after close discussion with CLIENT, the revised land use for the Site has been proposed as a commercial sub-centre for North Jakarta; a function warranted by its future connectivity with toll roads and MRT lines, the current lack of integrated and centralized commercial development in North Jakarta, as well as its relative head start of reclamation versus other reclamation projects.</p> <p>The Preliminary Conceptual Land Use Plan defines a simple and clear development framework that consists of a central U-shaped main boulevard linking to the future northern part of the Island, incorporating development parcels that have already been sold based on a previous layout plan, and integrating a water and green network that supports the marketing name of the Project: Riverwalk. Major development considerations such as building heights under the flight path restrictions for the nearby International Airport as well as future bridge and toll alignments were considered in the further zoning. A key feature for the Development is a central park and waterspace that is flanked by residential and mixed use parcels that can support an active and lively development at all times of the day and all days of the year.</p>	PT. Landscape Design of Darmo Hill Apartment, Surabaya, East Java	<p>TOWNLAND was commissioned to undertake the Conceptual Landscape Design, Schematic Landscape Design, Landscape Design Development and Design Coordination for the Darmo Hill Apartment Complex, one of the most prestigious estates in East Surabaya. This superblock consists of 7 Apartment Towers, connected by a vast landscaped podium.</p> <p>The Landscape Design Concept focuses on a Tropical Riverine, to support modern vertical living, enveloped by contrasting lush green spaces.</p> <p>The landscaped Podium is intended as the main facility for residents and is designed as a grand open space with large water features including "floating" Swimming Pools, which connect with a Koi Pond and a Kids' Water Park. The Swimming Pools are complemented by sunken lounges, playground areas and green mounds. The softscape elements are inspired by a hillside resort ambiance. Plants provide shade, whilst the sleek green mounds and terraces convey the ambiance of modern living.</p>	PT. Dharmabhakti Adijaya (member of PT. Lamicitra Nusantara Tbk.(Persero))	TOWNLAND	6	2017
Conceptual Master Planning for ±100 ha of Land at Marunda, Bekasi, West Java	<p>PT HACACA Logistics commissioned PT Meinhardt Indonesia in association with TOWNLAND to prepare a Conceptual Master Plan for an International-standard Business and Logistics Park on ±100 ha of land in Marunda, Bekasi Regency, West Java. Located on a Site with good connectivity and proximity to Tanjung Priok Port and the new Kalibaru Port, HACACA Business and Logistics Park is envisioned to become a New Benchmark for Integrated Warehousing Development that attracts and caters for International investors and tenants.</p> <p>HACACA Business and Logistics Park offers a variety of logistics products complemented with supporting facilities and housing for workers. The Logistics products offered vary in size, from 300 m² to 10,000 m². The Plan provides for up to 428 warehousing units providing employment for up to 5,500 workers. At the core of this Integrated Warehousing Development, supporting facilities are located, such as a Food Court, a Clinic, a Mosque, and a Fire & Police Station as well as the Marketing Gallery and HACACA's Office.</p> <p>Besides providing integrated and supportive services, the Project differentiates itself from many of its competitors by providing on-site housing for its future workers. For the blue collar workers, housing is provided in Dormitories, while for the white collar workers, there are Executive Apartments and Landed Housing. A green network is integrated throughout the Site, providing not only for water retention ponds, but also a 2 km jogging track that links the business area and the residential area.</p>	PT HACACA Logistics	PT Meinhardt Indonesia	6	2017
Conceptual Master Planning for ±23 ha of Land at South Sudimara, Ciledug, Tangerang, Banten	<p>TOWNLAND was commissioned to prepare a Conceptual Master Plan for a Residential Estate in southern Greater Jakarta, in an area which is well known as a "dormitory" town. To be able to compete with surrounding developments, a high quality spatial concept was proposed with a focus on maintaining compatibility with identified target markets. A key development challenge was the integration of separate sites divided by local roads, into one identifiable Development.</p>	PT. Maju Sukses Sentosa	TOWNLAND	3	2017

Preliminary Land Use Planning for ±3,000 ha of Land and Preliminary Conceptual Master Planning for ±500 ha (Phase 1) of Land in Tangerang	<p>MNC SMART City is the newest addition to PT MNC Land's portfolio of Integrated Township Developments in Indonesia. The ±3,000 ha Site is envisioned as a truly integrated SMART City, themed and differentiated by an Integrated Sports Facilities network. MNC SMART City aspires to be a new benchmark for Integrated Live, Work and Play environments in Indonesia.</p> <p>The Development is structured with 3 Centres, 1 Central Core at the heart and 2 Sub-Centres in the North and South of the Project Site. The North Sub-Centre will accommodate R&D oriented facilities, while the South Sub-Centre will capitalize on an existing train station and will be developed as a TOD-based development node. Located in the middle of the Site, the Central Core will benefit from direct access to the future Serpong-Balaraja Toll Road which will provide a direct connection to Jakarta City Centre and the Soekarno-Hatta International Airport.</p> <p>The ±500 ha Central Core is designated to be the centre of Business & Entertainment for the area, and comprises of a wide range of commercial development products, from commercial superblocks - consisting of shopping malls, offices, hotels and apartments; and MICE facilities - to smaller commercial plots, shophouses and supermarkets. The Central Core will provide ±24,700 apartment units and ±5,900 landed housing units, which will house approximately 122,400 future residents. All residential units in the area will have easy access to the Central Park through an integrated green network.</p>	PT MNC Land Tbk	TOWNLAND	3	2017
Pantai Indah Kapuk II – Modern Waterfront Lifestyle City (900 ha) in Tangerang, Banten	<p>TOWNLAND was commissioned to prepare Conceptual Landscape Planning and Landscape Design Guidelines in parallel with the Conceptual Master Plan for the +/-900 ha Pantai Indah Kapuk 2 Development, a strategic new Satellite Township near the Soekarno-Hatta International Airport.</p> <p>The Landscape Design Guidelines were prepared as a control measure to ensure that the implementation of the landscape works within the new Waterfront City will adhere to the key landscape concept for the Development – which features an Iconic Township Scale Landscape, Wide-Open-Integrated Cycle and Pedestrian Walkways, Continuous Open Space Linkages and Zone Based Landscape Character.</p> <p>Each Zone is distinguished into different themes, inspired by the luxury of gemstones, which is translated into the overall ambiance and landscape elements in synergy with each gem stone's character. The districts and parcels within each Zone also convey the identity of its Zone, through the arrangement of the landscape spaces, transitions and also through the careful selection of landscape elements and materials.</p>	PT Kukuh Mandiri Lestari (a subsidiary of Agung Sedayu Group)	TOWNLAND	3	2017

Landscape Design of Streetscape Area (11.35 ha) at Batam, Riau Archipelago	<p>TOWNLAND was commissioned to undertake Conceptual Landscape Design, Schematic Landscape Design and Landscape Design Development for streetscapes within the Bukit Permata Residential Cluster on the northern side of Batam.</p> <p>Batam is a small Island in Indonesia's Riau Archipelago in the North Natuna Sea. Located only a short boat ride from Singapore, it is a strategic place for many travellers and businessmen. The Site is located on a hill facing the Singapore Straits with a view of the Marina Bay Sands Complex Singapore in the distance. The first phase of Bukit Permata has been established since early 2000 and is now home to many expatriates, especially Singaporeans. PT. Ekadi Trisakti Mas is planning to continue the development of Bukit Permata Batam and the second phase will be named the Permata Riverview. TOWNLAND's focus was on the redesign of the existing streetscape and creation of new streetscape design for the area in the foothills which is designated as the main open space area for Bukit Permata.</p> <p>Bukit Permata is envisioned to be a high end Residential Cluster. In order to enhance the concept of luxury, the landscape area is designed using tropical style plants. The outdoor facilities are concentrated in the foothills facing the Clubhouse, with the concept of an Urban Forest, consisting of Multipurpose Lawns, a Mini Amphitheatre, a Jogging Track, a Mountain Bike Trail and a Childrens' Playground.</p>	PT. Ekadi Trisakti Mas	TOWNLAND	6	2017
Landscape Design of the Streetscape and Gateway Area (0.67 ha) at Samala Park Entrance, Cilegon, Banten	<p>TOWNLAND was commissioned to prepare Conceptual and Schematic Landscape Design for the streetscape and gateway area of the Samala Park Township, a 15 ha development by PT. Lumbung Usaha Sejahtera. The Project is strategically located at the heart of Cilegon.</p> <p>Cilegon is known as the Industrial City and the largest steel producer in Southeast Asia. It is also the City in which the bustling Merak Harbour is located. The Development is targeted to both locals and expatriates who work in the industries around Banten.</p> <p>The entrance area of Samala Park consists of a 200 metre main boulevard with two main roundabouts and an alfresco dining area around the Marketing Office in front of the Samala Park Apartment Development. It is designed with a tropical and vibrant landscape supported by rows of canopy trees, which make it an oasis in the midst of an arid Industrial City. The main boulevards feature pedestrian friendly walkways and integrated bike lanes. The alfresco dining area is designed as a big open plaza to accommodate modern lifestyle aspirations and to enhance the oasis concept of the entire Township Development.</p>	PT. Landscape Design of Main Boulevard at Paradise Serpong City, Tangerang, Banten	<p>TOWNLAND was commissioned to prepare the Landscape Design of Main Boulevard at Paradise Serpong City, Tangerang, Banten. This Project has an emphasis on boulevard beautification and redesigning of the main gateway on the north side of Paradise Serpong City. The objective of the Landscape Design is to create a new and fresh atmosphere for this residential development which differentiates it from surrounding developments. One of the strategies applied is to provide maximum visibility from the main access road by demolishing the existing gate and creating a major entrance statement in the form of a large scale signage wall that serves as the identity to the Development as well as for advertising media.</p> <p>The focus of the boulevard beautification is to develop a more pedestrian friendly environment throughout with wider and more convenient pedestrian walkways, including shared bike and pedestrian pathways. An essential consideration is the preservation of the existing trees and palms to maintain the ambience of a modern yet green suburban development.</p>	PT. Subur Progress	TOWNLAND	12	2017
Landscape Design of Magna Walk and Streetscape R1 (ROW 18) in Summarecon Bandung, West Java	<p>TOWNLAND was commissioned to prepare Conceptual Landscape Design and Soft Landscape Tender Drawings for an area of roadway in Summarecon Bandung, West Java. The focus of the design was on a Streetscape with a Right of Way of 18 metres, which forms one of the gateway areas into Summarecon Bandung. This street consists of a Marketing Gallery, Show Units and an Entrance Corridor. Improvements in the landscape design quality were achieved through the introduction of a strong welcoming entrance statement and vibrant soft landscape design featuring lush planting compositions, as well as through the incorporation of green nodes as an interesting landscape with public spaces.</p> <p>TOWNLAND also prepared the Landscape Design for Magna Walk, a pedestrian strip in the Magna Commercial Zone, which forms a ±750 m corridor connecting nine different thematic areas, including: a Campus Plaza, a Peddler Walk, a Seating Plaza, an Appetizing Walk, a Central Crossway, a Central Plaza, an Uptown Walk, a Biz Walk and a Biz Pocket Garden. The design includes vibrant soft landscape design (shrubs and trees) modern floor patterns and raised pedestrian crossing walkways, modern urban furniture, connected outdoor plazas, as well as an integrated canopy design along the walkway.</p>	PT. Preliminary Conceptual Land Use Plan for ±786 ha of Land at Kota Baru Parahyangan, Padalarang, West Java	TOWNLAND was commissioned by its longstanding CLIENT PT Beluputera Intiland and its partners to carry out a Preliminary Conceptual Land Use Plan for its landmark Integrated Township Development outside Bandung, West Java, Indonesia. TOWNLAND had previously prepared a Conceptual Master Plan for the Project, however changing market conditions, renewed regional road networks and updated Government requirements resulted in CLIENT wanting to carry out a review of the existing Master Plan in order to maximize development opportunities, as well as to facilitate development by its various stakeholders. Considering the complex topography and the renewed baseline information and requirements, the existing Master Plan was updated to provide additional commercial facilities (capitalizing on the increased regional accessibility), renewed cluster subdivision planning (providing ease-of-development by the various corporate entities) and renewed overall circulation to reflect on new development within the Site (built works such as an 18-hole PGA standard golf course).	PT. Belaputera Intiland	TOWNLAND	3	2017
Preliminary Conceptual Master Planning for ±385 ha of Land at Tanjung Gunung, Bangka Belitung Islands.	<p>PT PAN Semujur is planning to invest in and develop the ±385 ha Tanjung Gunung Site on Bangka Island into a new Strategic Special Economic Zone; and a new Integrated Tourism Destination that supports and complements the existing Special Economic Zone on Tanjung Kelayang, Belitung Island. Tanjung Gunung is envisioned as an Integrated Coastal Entertainment and Resort Destination.</p> <p>TOWNLAND was commissioned to prepare a Preliminary Conceptual Master Plan for the Site. Maximizing the offerings of the Site conditions and its regional positioning, the plan envisioned proposes a multitude of entertainment facilities, hotels, commercial and residential products that complement the natural and ecological resort offerings that exist on the nearby Belitung Island.</p> <p>The main development features proposed in the Preliminary Conceptual Master Plan are the Entertainment facilities, which range from very active in the form of a Theme Park and Water Park, to more passive and educational in the form of a Wetland Park, and from the celebration of Culture and History in the Old Town Garden to leisurely activities on the Lifestyle and Festival Beach areas, as well as the Hillcrest Park.</p> <p>A variation of accommodation facilities throughout the Site offer various experiences to support the successful development of the Project, and promote repeat visits and longer stay ing tourists. The integrated Destination also provides commercial facilities, including a MICE & Mall Development, as well as Arts & Crafts Market that provide local souvenirs, handicrafts and local foods and beverages prepared by the local community.</p>	PT PAN Semujur	TOWNLAND	2	2017

Landscape Design for the Royal Park Apartment, Kebayoran Lama, South Jakarta, Indonesia	<p>ABMA Land, a distinguished Property Developer in Jakarta specializing in high-end vertical residential development, commissioned TOWNLAND to develop Conceptual Landscape Design for their latest prestigious Project in South Jakarta, the Royal Park Apartment.</p> <p>Located on a green riverfront corridor (Pesanggrahan River) in Cipulir District, Royal Park Apartment promotes modern riverfront living within the urban context of Jakarta. Water Sensitive Urban Design was used as the main approach for the overall design (site planning, architecture and landscape). This approach was expected to further increase the value of the Project, which has a potential and promising site location and excellent accessibility being adjacent to future mass transportation routes as well as in close proximity to the prominent business and commercial districts in Jakarta.</p> <p>In order to create a high-end ambience, the Landscape Design for the Royal Park Apartment utilised a Tropical Resort theme, unifying five apartment towers and one commercial centre. The organic shape of the hard landscape elements and lush planting selection for the soft landscape elements are chosen in order to create a feeling of leisure for residents. The Development has a 75% green ratio and features shaded boulevards and convenient access for pedestrians and bicycle users.</p>	PT. Trixindo Selaras (Subsidiary of ABMA Land)	TOWNLAND	3	2017
Landscape Design for ±2.36 ha of Land at Residential Area Balikpapan, East Kalimantan	TOWNLAND was commissioned by HK Realtindo, a state owned company, to undertake comprehensive Landscape Design Services for a residential area in Balikpapan, East Kalimantan. TOWNLAND's Services included Conceptual Landscape Design through to the Tender Documentation stage and Periodic Site Inspections during the Construction Period. The Project required specific design solutions to tackle the challenging contours of the Site. Landscape interventions covered for the design of residential and commercial areas.	PT. HK Realtindo	TOWNLAND	9.5	2018
Landscape Design for ±2.5 ha of Land at Lakeside Area at Citra 6, West Jakarta	TOWNLAND was commissioned by the Ciputra Group and the Mitsui Corporation to undertake comprehensive Landscape Design Services for an Apartment Complex next to an existing lake in West Jakarta. TOWNLAND's Services included Conceptual Landscape Design through to the Tender Documentation stage and Periodic Site Inspections during the Construction Period. The Project focused on the large open space areas in between the apartment towers, which function as the swimming pool area supported by leisure, sport and playground facilities. A variety of design treatments were proposed along waterfront areas including a Mini Zoo, Eco Corner and thematic Japanese Gardens. The design themes adopted sought to integrate modern urban architecture with the natural setting of the waterfront area.	PT. Cakrawala Respati and PT. Citra Menara Megah	TOWNLAND	1.5 and 4.5	2018

Landscape Design Service of Tokyo Riverside Apartments, Tangerang, Banten	<p>Tokyo Riverside Apartments is located in Pantai Indah Kapuk 2 Tangerang, which is being developed as a modern Township, surrounded by a prominent commercial area. It is a Mixed Use Building Complex consisting of eleven Apartment Towers with commercial facilities located on the ground floor of each Tower, integrated with its surrounding neighbourhood. These commercial facilities are used as entrance statements together with public areas. The landscape design area includes the entrances, as well as the plazas, and outdoor seating in between the Towers, which can be interpreted as a large communal space.</p> <p>“Urban Casual” is chosen as the overall landscape design theme in order to bring out the concept of casual living in a modern urban environment dedicated for small families and children. In visual terms, the design theme is expressed by the irregular yet simple forms, such as the tectonic shape of planters, alfresco terraces, pedestrian pathways, as well as an organic entrance plaza and pocket gardens. The casual nature of the design is also defined by informal and flexible facilities and activities, such as outdoor alfresco terraces, a childrens’ playground, sitting-out-areas and gardens, small plazas and a clubhouse.</p> <p>TOWNLAND was commissioned to prepare the Conceptual Landscape Design, Schematic Landscape Design, Landscape Design Development, Landscape Design Tender Drawings and Implementation Specifications, together with Periodic Site Inspection and Reporting During the Landscape Construction Stage.</p>	PT. Conceptual Master Planning for ±20 ha of Land in Nipah Beach, North Lombok	<p>Lombok Island is a popular Island in Indonesia for tourism and features beautiful natural beaches which attract Local as well as International tourists. PT Mulia Colliman International, with strong experience in resort development sees the Island as an opportunity to create an International Resort Destination along Nipah Beach. TOWNLAND was appointed as Master Planner to analyze the potential of the Site and to formulate an iconic and integrated Resort Destination to International standards.</p> <p>To differentiate itself from other surrounding developments, Nipah Bay Resort introduces a 1.5 ha artificial lagoon as its signature feature that will accommodate a variety of watersport activities and create a family friendly environment. Two types of accommodation (Hotels and Villas) are positioned to optimise ocean views and lagoon views. The Resort is further complemented by a Wellness Centre, F&B, Commercial Uses, and a Beach Club as amenities and entertainment facilities for visitors.</p> <p>The general design concept of this Development offers distinctive spatial experiences and unique facilities and accommodation. The green open space areas link the Hotels and Villas with their amenities and a commercial area by creating a dynamic and borderless experience, which also continues towards the Beach Club and Infinity Pool that looks over the sea. Thematic tropical gardens and a terraced pond meandre around the Site to create a unique identity for the Development.</p>	PT Mulia Colliman International	TOWNLAND	6	2018

Landscape Design for ±1.65 ha of Land at Ammi Hotel In Medan, North Sumatra	TOWNLAND was commissioned by the Samali Group to undertake comprehensive Landscape Design Services for the 5-star Ammi Medan Hotel, in Medan, North Sumatra. TOWNLAND's Services included Conceptual Landscape Design through to the Tender Documentation stage. The Project focused on the design of waterfront areas along an existing lake which included a Swimming Pool, a Wedding Lawn and other leisure, sport and play facilities. The concept adopted for the Development sought the creation of a luxurious marina ambience, featuring outdoor dining activity overlooking the yachts on the lake.	PT. Lintas Insana Wisesa	TOWNLAND	3.5	2018
Landscape Design of Show Unit Village at Paradise Serpong City, Tangerang, Banten	<p>TOWNLAND was commissioned to prepare Landscape Design for a Show Unit Village at Paradise Serpong City, Tangerang, Banten. The 3,411 m² of Show Unit Village is located on the south side of Paradise Serpong City's Marketing Gallery, a Township at South Tangerang. CLIENT's Brief for the Project was to create a new concept to showcase their show units, which is integrated with the surrounding landscape. It is also intended as a place to facilitate their marketing events.</p> <p>The concept for the Show Unit Village is "Tropical Suave" which incorporates organic expressions with lush greenery under a tropical resort theme. Visitors can traverse the viewing bridge where they can admire the Show Unit Village under preserved existing trees before accessing the Village from the Marketing Gallery. Visitors are welcomed to the Village by a cascading waterfall that integrates with stairs and a seating area. The spacious lawn at the centre of the area can accommodate various events held by Town Management.</p> <p>In front of the Show Units, a pedestrian pathway showcases the Development surrounded by beautiful and lush gardens. A backyard garden connects each Show Unit with seating areas, shaded with big trees. On the southern side, an open floating pavilion is featured, situated above a reflecting pond and accentuated by a cluster of Parahyba trees. Simple and elegant landscape furniture has been selected to complement the modern look of the Show Units.</p>	PT. Subur Progress	TOWNLAND	6	2018
Landscape Design for ±3 ha of Land for Apartment in Summarecon Serpong, Banten	TOWNLAND was commissioned by the Summarecon Group to undertake comprehensive Landscape Design Services for an apartment complex in Summarecon Serpong. The project consisted of four Apartment towers in Midtown Signature and six Apartment towers in Midtown Residences. TOWNLAND's Services included Conceptual Landscape Design through to the Tender Documentation stage and Periodic Site Inspections during the Construction Period. The Project focused on the open space areas between the Apartment towers where the Swimming Pool and other leisure, sport and play facilities were located. Landscape Design of World Capital Tower at Mega Kuningan, DKI Jakarta	<p>World Capital Tower is a high rise Office Tower strategically located at the centre of Mega Kuningan Business District in South Jakarta. Being a prestigious global financial landmark, World Capital Tower emphasizes the idea of secure and modern design. The Development is designed to provide comforts for users and employees with leisure areas such as a café with outdoor seating and relaxing landscape settings.</p> <p>The landscape idea represents the flow of energy using curved lines corresponding to the outline shape of the Tower. Positioned 1.2 metres above road level, the landscape area is transitioned with colourful cascading planting at its frontage and feature artworks and water features. The planting composition is designed using a combination of six large Champion Trees and colourful shrubs to give a vibrant urban ambience as a welcoming entrance feature. Vertical gardens are used to transition from the front to the back of the property.</p> <p>TOWNLAND prepared the Conceptual Landscape Design, Schematic Landscape Design, Landscape Design Development, Landscape Design Tender Drawings and Implementation Specifications and undertook Periodic Site Inspections and Reporting during the Landscape Construction Stage.</p>	PT. Conceptual Master Planning for ±12.4 ha of Land at Tembalang, Semarang, Central Java	<p>TOWNLAND was commissioned by PT. Dasa Willis Raya to develop a Master Plan for a ±12.4 ha extension of the existing Graha Estetika Development in Semarang, Central Java.</p> <p>The Project Site is located in the South East of the City of Semarang, in close proximity to the large and well-known Diponegoro University, and close to the regional Toll-road linking Semarang to Solo.</p> <p>TOWNLAND developed several options for development of the Site, initially focusing on capturing the growing demand for apartment type housing, and subsequently revising this to be mostly landed housing – similar to the existing Graha Estetika Development. Existing HV powerlines, Government water retention areas and connections to adjacent development were all considered while maximizing development opportunities. The central waterbody required for Government irrigation/retention is proposed to become a central feature for the Site's future residents, while the HV powerline is screened by and integrated into a wide boulevard, flanked by shophouses. Ultimately CLIENT decided that the market requirements consist of both landed housing and apartments and decided to submit a hybrid of TOWNLAND's design options to the Authorities for approval.</p>	PT. Preliminary Conceptual Master Planning for ±221 ha of Land at Singhasari, Malang, East Java	<p>ITDC (Indonesia Tourism Development Corporation) and its partner PT Intelegensia Grahatama aspire to benefit from Indonesian Central Government's policy to use Tourism Development as one of the main economic drivers to grow and support local economies, and its associated incentive programme of development of Special Economic Zones (SEZ) for Tourism Townships. The Project, Singhasari Integrated Tourism Complex (SITC), is proposed as one of these SEZ's: an Integrated Tourism Destination that promotes historical tourism through interactive visitor parks, and implementation and integration of cutting-edge digital technologies.</p> <p>Inspired by Singhasari's relics in the vicinity of the Site and to honour its amazing heritage, SITC will further unearth Singhasari's history and legacies, and will create a Tourism Destination that revolves around the glory of Singhasari's Kingdom and what it could bring to further develop Indonesia's future.</p> <p>TOWNLAND prepared a Preliminary Conceptual Master Plan for SITC which provides a journey through time and space. This journey is implemented through the development products within the development area. "The Past" is implemented in an entertainment area that will celebrate and showcase the glory of Indonesia's and Singhasari's history. "The Present" is reflected by the facilities and functions that enable and support the development of the Tourism Destination, and "the Future" is represented by a Technopark where the future is developed in R&D and co-working spaces.</p>	PT ITDC (Indonesia Tourism Development Corporation)	TOWNLAND	3	2018
Conceptual Master Planning For ±20 ha of Land In Bandung, West Java	<p>IP569</p> <p>TOWNLAND was commissioned by PT. Multi Megah Persada to prepare a Conceptual Master Plan for a ±20 ha new Township adjacent to a new toll road that connects the regional City of Bandung with the suburb Township of Soreang in West Java. The Project Site is located in the Southwest of the City of Bandung, in close proximity to the Soreang Central Government and Cultural Centre, and will directly connect to a new toll road, linking Soreang to Bandung. TOWNLAND developed several options for the Site, initially focusing on capturing the growing demand for landed housing with various target markets due to the new toll road construction.</p> <p>Existing access to the Site, the new toll exit location, future potential land extensions and a new modern market planned across the toll road were all considered while maximizing development opportunities for the Project. An existing irrigation channel within the Site is proposed to become a green belt feature for this residential area, creating a new water feature and retention area.</p>	PT. Landscape Design of Synthesis Residence Bona Indah Project, Lebak Bulus, Jakarta Selatan	<p>TOWNLAND was commissioned to undertake the Conceptual Landscape Design of the Synthesis Residence located in Lebak Bulus, a strategic development area in South Jakarta. The Site is surrounded by International schools, hospitals, office complexes, commercial areas, and an MRT Station, which will be fully operational by 2020. The Development consists of 2 existing towers and a further 3 towers will be developed on the south side of the Site. The existing landscape area is shaded by mature trees, which are intended to be preserved as part of the valuable assets within the Site.</p> <p>A “Tropical Escape” theme is chosen to complement the ambience of West Nusa Tenggara, specifically Sumba, as per CLIENT’s preference. The landscape area is divided into 2 zones; a Relax Area (Site A) on the northern side and an Active Area (Site B) on the southern side, separated by a lagoon-like pool in between the zones.</p> <p>The Relax Area is designed for tenants who enjoy walking, doing Yoga, or having their feet massaged on the reflexology path while feeding fish in the fish pond. The building features take their shape from the traditional Sumba house, Uma Mbatangu, with modern concrete screening. On the other side, the Active Area is designed to be more playful, providing various adventure play experiences for children, where they can climb on grass mounding, explore the tunnel underneath, and walk up a canopy trail.</p> <p>At the entrance to the southern towers complex, Sumba’s vibe is delivered through an iconic sculpture on the roundabout, resembling famous horsemen from Sumba’s history, surrounded by savanna-like shrubs. The ambience is completed by a diversity of decorative elements and ornaments derived from traditional Sumba accessories.</p>	PT. Synthesis Karya Pratama	TOWNLAND	6	2018

Preliminary Conceptual Master Planning, Architectural Design and Landscape Design of Resort Development in Pulau Bira Besar, Kepulauan Seribu, DKI Jakarta	<p>Pulau Bira Besar, one of the '1000 Islands' off the coast of Jakarta, is aiming to set a new eco resort benchmark and to become a tourism icon in the Region. TOWNLAND was commissioned to prepare the Preliminary Conceptual Master Plan, followed by Architecture Design and Landscape Design. The opening is slated for 2018.</p> <p>The ±30 ha Island is planned and designed as a combined 4 and 5 Star Eco-Resort that provides privacy and maximizes views from the cabins, respects and restores nature, attracts and entertains visitors and as such provides an integrated Eco-Resort Destination. The first phase of the Resort will be focused on the development of a glamorous style of camping.</p> <p>The existing natural environment with extensive vegetation is mostly maintained, and the majority of the structures are proposed to be built on the periphery of the Island – maximising views and with direct access to its white sandy beaches and shallow seas with coral reefs. Architecture using natural materials and specialist bamboo construction techniques seamlessly blend into the natural environment. Access to the 5 different ecosystems from lakes, forests, beaches, a coral reef and deep ocean makes Pulau Bira a complete package for an Island Tourism Destination.</p> <p>Within the Resort, a selection of high quality villa accommodation is proposed - to cater to the family and corporate market - as well as exclusive beachfront, forest and floating villas for the high-end spenders (total 177 keys). This accommodation is completed with a Day Visitors Area, Dive and Watersport Centre, Destination Restaurants, Meeting Rooms and various Outdoor Facilities. The Island offers the first integrated Resort experience within Kepulauan Seribu and its immediate vicinity.</p>	PT. Patra Jasa	TOWNLAND	12	2018
Conceptual Master Planning for ±12 ha of Land at Ngaliyan, Semarang, Central Java	<p>TOWNLAND was commissioned by PT PP Properti, TBK to prepare a Conceptual Master Plan for a ±12 ha extension of the Payon Amartha Housing Complex in Semarang (for which TOWNLAND prepared the Permata Puri Conceptual Master Plan in 2013).</p> <p>This new Development is envisioned to capture the market in the City of Semarang and its surroundings, and fulfill and facilitate the commercial needs of the adjacent Payon Amartha Area and Region. To achieve this Vision, several strategies have been applied in formulating the Conceptual Master Plan, including : (1) utilizing Site features; (2) unique space making for branding; and (3) provision of a mix of development products to capture a variety of users.</p> <p>The resulting Conceptual Master Plan consists of 125 Landed Housing Units, 5 Apartment Towers with a total of 4,000 units, a Thematic Public Park, a unique Hillside Waterpark, a 3-star Boutique Hotel, Open-air Riverside Food and Beverage options, 49 Shop Houses, an International School, and at the centre of the Site, a combination of a Residential Clubhouse & Wedding Venue, including a unique 10 metre high Waterfall that will become the signature and branding feature for the Site.</p>	PT. Conceptual Master Planning for ±23.9 ha of Land at Cihuni Gading Serpong – Tangerang, incl. Conceptual Landscape Design for ±11.2 ha of Land, Gading Serpong, Tangerang, Banten	<p>The development of the ±23.9 ha Lausanne Residences at Cihuni, Gading Serpong is designed as a luxurious modern living enclave, with exclusive and integrated neighbourhood outdoor spaces. The Site is developed to be a fully landed residential area, where the total saleable area is 11.6 ha (47.1 %).</p> <p>The residential area is divided into three clusters, with one centrally located clubhouse, which is aimed at the high-end target market and will be the most high-end residential development of Paramount Land. As one of the key development features, an integrated Green Spine Network has been incorporated, where all green open spaces within the Site are connected with each other by means of the pedestrian linkages. To create a vibrant neighbourhood, thematic gardens and landscape features are distributed throughout the Green Spine Network (both in Green Parks and Green Corridors), as well as throughout the streetscapes.</p> <p>During the design process, key design considerations included the exclusivity of the Development to create a special living experience, the luxury of the amenities in the common outdoor areas, the premium quality of the materials used, the creation of sophisticated outdoor spaces to support a high-end modern lifestyle, and the ultimate privacy of the Development.</p> <p>TOWNLAND was commissioned to prepare the Conceptual Master Planning and Conceptual Landscape Design.</p>	PT. Landscape Design of The Riviera at Puri in West Jakarta	<p>TOWNLAND was commissioned to prepare Conceptual Landscape Design, Schematic Landscape Design, Landscape Design Development, Landscape Design Tender Drawings and Implementation Specifications and to undertake Periodic Site Inspections and Reporting during the Construction Period for the ±3 ha The Riviera located adjacent to the Metland Puri. The Riviera serves as one of the most exclusive residential clusters in the area. The overall Vision for the landscape design is to support the creation of a lively tropical residential area where different thematic gardens activate and animate the open spaces. Neighbourhood facilities that can be used by all people of all ages at all times of the day are provided. These features differentiate The Riviera from all other residential developments in Jakarta.</p> <p>The ambience of an exotic, yet luxurious tropical resort supported by an active public realm is developed as the main landscape theme for this cluster. It is represented by the grand design of the Main Gateway that combines lush greenery in the form of striking planting arrangements, artworks and outstanding lighting and sculpture. Communal gardens are created at the south side of the Site and are shaded with tropical trees which act as a fascinating green backdrop for the entrance. Continuous jogging tracks along pleasant green spines lined with shady tropical trees surround the entire Site and represent a pedestrian friendly environment. A series of 7 Thematic Gardens: Leisure Garden, Eco-Explore Garden, Enchanting Garden, Sensory Garden, Adventure Garden, Harvesting Garden and Inspiring Garden provide a diverse and relaxing atmosphere and a pleasant place to live.</p>	Keppel – Metland Joint Operation	TOWNLAND	12	2018

Project	Project Description	Client	Lead Consultant	Duration of Project (months)	Completed (year)
Conceptual Master Planning for ±53 ha of Land at Villa Puncak Tidar, Malang, East Java	<p>TOWNLAND was commissioned to prepare a Conceptual Master Plan for a 53 ha extension area of the pre-existing Villa Puncak Tidar residential complex in Malang. Located on hilly terrain, Villa Puncak Tidar Extension is envisioned as a high quality residential development that capitalizes on its natural assets, maximizes views and offers a variety of development products for future buyers. The Development is characterized by an exclusive Hilltop Villas complex, ten Residential Clusters and one Boutique Apartment parcel with a School, a Clubhouse, and a Mosque. Ultimately, the Villa Puncak Tidar Extension will provide 1,300 landed houses and 370 apartment units for approximately 6,700 future residents.</p> <p>The main challenge of the Site is its extreme topography with an approximately 140 metre level difference from the lowest and highest points, and more than a third of the area consisting of very steep slopes (>15° gradient). To optimize the Development, some of the contours are proposed to be reshaped while still generally retaining the Site's basic natural landform. The concept of the Conceptual Master Plan does this by arranging "upslope – downslope" housing, allowing each house to have views. The Site's natural features are also integrated into the Conceptual Master Plan by allocating a green spine along an existing river valley, creating a Central Park for the Development. Retaining the valley will also ensure surface water run-off can be discharged naturally. The Conceptual Master Plan also allocates small green buffers, via medians and pocket parks, to catch and guide stormwater run-off, and applies Water Sensitive Urban Design principles.</p>	PT Podo Joyo Masyhur	TOWNLAND	3	2018

Design of Puncak Resort at Bogor Regency, West Java	<p>Puncak Resort, located in Bogor Regency, West Java, Indonesia, is planned as a distinctive villa and hotel suite destination with a strong middle-eastern character. It comprises 2.2 ha of land with approximately 30,800 m² GFA. TOWNLAND was commissioned to prepare the Conceptual, Schematic, Design Development, Design Tender Drawings and Implementation Specifications, and to undertake Periodic Site Inspections and Reporting during the Construction Stage in respect of the Architecture, Landscape Architecture, Structural Design, Mechanical/Electrical /Plumbing Design and Quantity Surveying of the Project.</p> <p>The land uses within the Project include Retail Shophouses (Ruko), a Hotel and Villas and Resort Gardens. Puncak Resort will have 111 hotel rooms, 30 private villas and 12 retail shophouses (ruko). There will be 3 types of hotel rooms: Deluxe at 32 m² and Suite as well as Suite with Garden at 48 m². There will also be 2 types of flexible private villas: Small Flexible Villas with a lot size of 90 m² and Large Flexible Villas with a lot size of 217.5 m². The villas have valley, mountain and garden views. The retail shophouses (ruko) are 2 storey buildings with a Gross Floor Area of 176 m² each.</p> <p>The overall design concept of the Development offers unique experiences and extravagant resort ambiances, for both domestic and international tourists. Attractive yet picturesque spatial experiences have been developed with various themes for the development products: contemporary Middle-Eastern atmosphere at the retail shophouses (ruko) and hotel area, lush tropical ambience at the resort garden, and green modern influences for the private villas.</p>	PT. Landscape Design for Streetscape Corridor Jend. Sudirman – Gatot Subroto, Jakarta	<p>This 5 km of street corridor beautification Project is located at Jalan Jend. Sudirman and Gatot Subroto, a prime CBD area in the heart of Jakarta and adjacent to various important historical sites including the Semanggi Bridge and the Gelora Bung Karno Stadium. The Project is part of the Capital City's beautification to support the largest multi sport event in Asia, the Asian Games 2018. The intention behind the Project is to create a new concept for a streetscape corridor, which is integrated with the MRT system and the surrounding urban landscape. It is also intended as a place to facilitate various public activities.</p> <p>The concept for the street corridor incorporates line expressions with cultural ribbons, which represent the continuity of the traditional Betawi pattern along the pedestrian and bicycle lanes. Pedestrians can walk through a safe and comfortable urban environment, where they can also experience diverse public performances and various thematic cultural and education spots, whilst enjoying their stroll under new colourful planted trees along the green belt. Seating areas and bicycle racks are provided along the corridor to support better mobility for the public.</p> <p>The pedestrian pathway showcases simple and elegant street furniture, and is equipped with a smart system to complement the World's quality urban corridors, as well as to support a new urban lifestyle, where pedestrians, cyclists and vehicles can exist in harmony with each other.</p>	PT. +/- 200 ha Maritime and Tourism Hub Special Economic Zone, Pangandaran, West Java	<p>PT Pancajaya Makmur Bersama is planning to invest and develop a ±200 ha Site in Pangandaran, West Java into a new Strategic Special Economic Zone (SEZ) as a Maritime and Coastal Tourism Industry Hub. Inspired by a strong maritime culture and history, and known for beautiful long beaches, Grand Pangandaran is envisioned to revive the glory of Indonesia's maritime treasures through tourism and development of a marine business & research centre. In doing so, the area is striving to become a new economic and development generator for the southernmost region of West Java.</p> <p>Following the Vision, Grand Pangandaran is proposed as the new "Kota Pesisir" (Coastal City) that provides visitors with various types of accommodation - ranging from budget hotels to 5-star resorts, marine and ocean themed entertainment, a lifestyle mall, and a complete experience of local culture and culinary traditions in 'Bahari Town' (Mixed Use Area), which is fully pedestrianized and provides easy access to the nearby beach. One of the key features in this Development are the preserved paddy fields which are enhanced with boardwalks and Sundanese themed restaurants, creating a picturesque landscape and creating the new potential tourism hotspot in Pangandaran.</p> <p>To support and promote local economic development, Grand Pangandaran also provides a 'Marine Technopark' that will support research collaboration between multidisciplinary sectors with a focus on Marine Technologies. This will widen opportunities for incubator businesses and start-ups, as well as providing training for local people to develop their skills in the marine industry business. Together, this area is envisioned as a new 'Pusat Bahari' (Marine Centre) of West Java that will revive the glory of Indonesia's maritime treasures.</p>	PT Pancajaya Makmur Bersama	TOWNLAND	3	2018

Collins Boulevard Mixed Use Development, Serpong, Tangerang	<p>Collins Boulevard is a Mixed Use Development Complex consisting of Vertical Residential, Soho, Retail Outlets, Office Towers and Hotel. It is strategically located at the Serpong main road connecting South Tangerang and Tangerang City. Inspired by the prestigious Collins Street in Melbourne, the main concept is envisaged to be a Live-In Gallery, to give a unique urban living experience with an artsy environment.</p> <p>Diagonal lines and minimalist edges with a touch of contemporary artwork liven up the landscape ambience as an urban living neighbourhood. Divided into four main areas, each area is given a unique design style to allow eventful experiences for both private and public users. At Ground Floor Level, users will be directed from a lush green landscape along the public pedestrian corridor to a vibrant and edgy Avenue of the Stars Plaza that connects to the Retail Area seamlessly. Residents get the benefit of the landscape facilities at Podium Level, which contains a wide range of community-oriented facilities with a playful and child-friendly landscape, including two imposing swimming pools, outdoor terraces, an outdoor gym, a playground, yoga facilities and a kids' centre. Residents can also access the Sky Level, designed for maintaining well-being, with a looping jogging track, a yoga platform and a panoramic lookout.</p> <p>The planting composition for Collins Boulevard adopts an urban lush scenery with abundant choices of green shrubs and trees along the public pedestrian corridor, flowering trees as a welcoming gate, various palm trees decorating the podium level, as well as wind tolerant trees for the sky level.</p> <p>TOWNLAND was commissioned to do the Conceptual Landscape Design, Schematic Landscape Design, Landscape Design Development, together with the Periodic Site Inspections and Reporting During the Landscape Construction Stage.</p>	PT. Landscape Design for MPP Tower, Jakarta, Indonesia	<p>TOWNLAND was commissioned to prepare Conceptual Landscape Design, Landscape Design Development and Landscape Design Tender Drawings and Implementation Specifications and to undertake Periodic Inspection and Monitoring during the Construction Period for a 59-storey premium-grade Office Tower located in the heart of Jakarta's CBD. The landscape design concept for this Project is 'Dynamic-Green-Modern'. The main objective is to extend the dynamic curved prow of the architecture design expression into the landscape area, and subsequently create the landscape as a sculptural urban green space. Inspired by the simplicity and modernity of Japanese design style, a series of low walls are arranged fluidly in the form of undulating lines combined with grass mounds and low dense shrubs with accent trees. Together this serves as the secure and dynamic green frontage for the Development and offers a unique human scale experience for the pedestrian passers-by and visitors.</p> <p>As the Site conveniently sits next to a newly upgraded grand pedestrian way along Jl. Jenderal Sudirman, the pedestrian entrance to the Office Complex is specially designed to welcome visitors through the provision of wide staircases completed with ramps for the disabled and marked by a special feature tree as a welcoming statement.</p> <p>The landscape space at the back of the Property provides a more casual green atmosphere for a more flexible use for the office tenants. At the 13th and 14th Floors, outdoor terraces are provided to complement the retail spaces with modern water features and greenery, which allows visitors to enjoy the stunning City views from above.</p>	JO. Preliminary Conceptual Master Planning, Conceptual Landscape Design, Review and Design Coordination, and Landscape Construction Inspections for Resort Development in Lembang, Cisarua, West Bandung.	<p>Dusun Bambu Family Leisure Park is an integrated Eco and Cultural Tourism Destination in West Java. Located just outside of Lembang in the highlands and featuring fresh air, a natural environment and panoramic views, the Site provides a welcome escape from the hustle and bustle of hectic city life in Bandung and Jakarta. The Site's diverse, nature inspired and culturally sensitive programme of activities is highly family oriented and attracts just over a million visitors annually. Due to its high popularity, the Owner wishes to review its current operations and layout, add more facilities and expand the overall development. The Vision for the Project is to become the leading eco, cultural and educational Tourism Destination, not only in West Java, but within the South East Asia Region.</p> <p>Inspired by the strong Vision and mission, TOWNLAND worked closely with the Owner-operator and others to develop a unique concept to elevate Dusun Bambu's branding and identity. This was achieved by weaving strong thematic traditional stories and values into the overall development of the Master Plan, its landscape and architectural elements, as well as facilities and activities.</p> <p>The concept is inspired by the captivating storyline of '9 Pusaka' (the 9 Relics, a storyline inspired by Sundanese Folklore). This is translated onto the Site by creating several spatial zones. Each of them is infused with uniquely different themes, facilities and activities. And, as a reference to the Dusun Bambu name, each zone will be characterized by a different species of bamboo. The overall facilities and programme will include integrated pedestrian circulation with sequential experiences, culinary spots, traditional play-gardens, an outdoor performance stage, an arboretum and a variety of outdoor play areas, as well as a cultural museum. All of these are supported by carefully-designed landscape features that use modern technology to enable sustainable development.</p>	PT. Lawang Angin	TOWNLAND	12	2019

EXAMPLES OF PROJECTS IN INDONESIA

Project	Project Description	Client	Lead Consultant	Duration of Project (months)	Completed (year)
Conceptual Master Planning for ± 90 ha of Land at Sriamur, Bekasi Regency, West Java	<p>PT Hasana Damai Putra plans to develop a ±90 ha Site in Sriamur, Bekasi Regency, West Java into a new integrated residential area with a high quality environment. TOWNLAND was appointed to develop the Conceptual Master Plan which envisions this Development as 'Living in Harmony with Nature'. The Development is proposed to incorporate a sustainable environmental concept by integrating a stormwater management system and green open spaces to mitigate potential flooding on this low-lying and flat Site. To promote pedestrian and bicycle activities, a pedestrian and bicycle network has been integrated with the open space system, providing easy connectivity between the residential and commercial areas.</p> <p>This Development provides various development products and supporting facilities for its residents, as well as the surrounding community and includes 14 clusters of landed residential housing comprising of 3,453 units. The clusters are designed with a cul-de-sac system and each contains a central open space that can be used as a children's playground and community space. The Development also offers a Mixed Use area which is a combination of apartments and commercial functions that capitalize on its lakeside location. A Food and Beverage area is also located at the lakeside and is envisioned to become a new destination providing entertainment and leisure for residents and visitors.</p>	PT Hasana Damai Putra	TOWNLAND	3	2019
Landscape Re-Design of Existing Area (0.8 ha) and Extension Area (1.8 ha) of Essence Darmawangsa Apartments and 5 Stars Hotel In South Jakarta	<p>TOWNLAND was commissioned by the Samali Group to undertake comprehensive Landscape Design Services for the renovation and extension of the existing high-end apartment complex, Essence Darmawangsa, in South Jakarta. The Project consisted of several apartment towers and the Ammi Hotel Jakarta. TOWNLAND's Services included Conceptual Landscape Design through to the Tender Documentation stage and Periodic Site Inspections during the Construction Period. The Project comprised of the renovation design of the Entrance Gateway, Drop-off Lobbys, Feature Bridges and large open space areas including a Central Water Body and Community Lawn. The design themes adopted sought to integrate the modern and luxurious ambience of the Development with a lush tropical landscape as an oasis for inner city living.</p>	PT.
